U. S. Department of Agriculture

FOREWORD

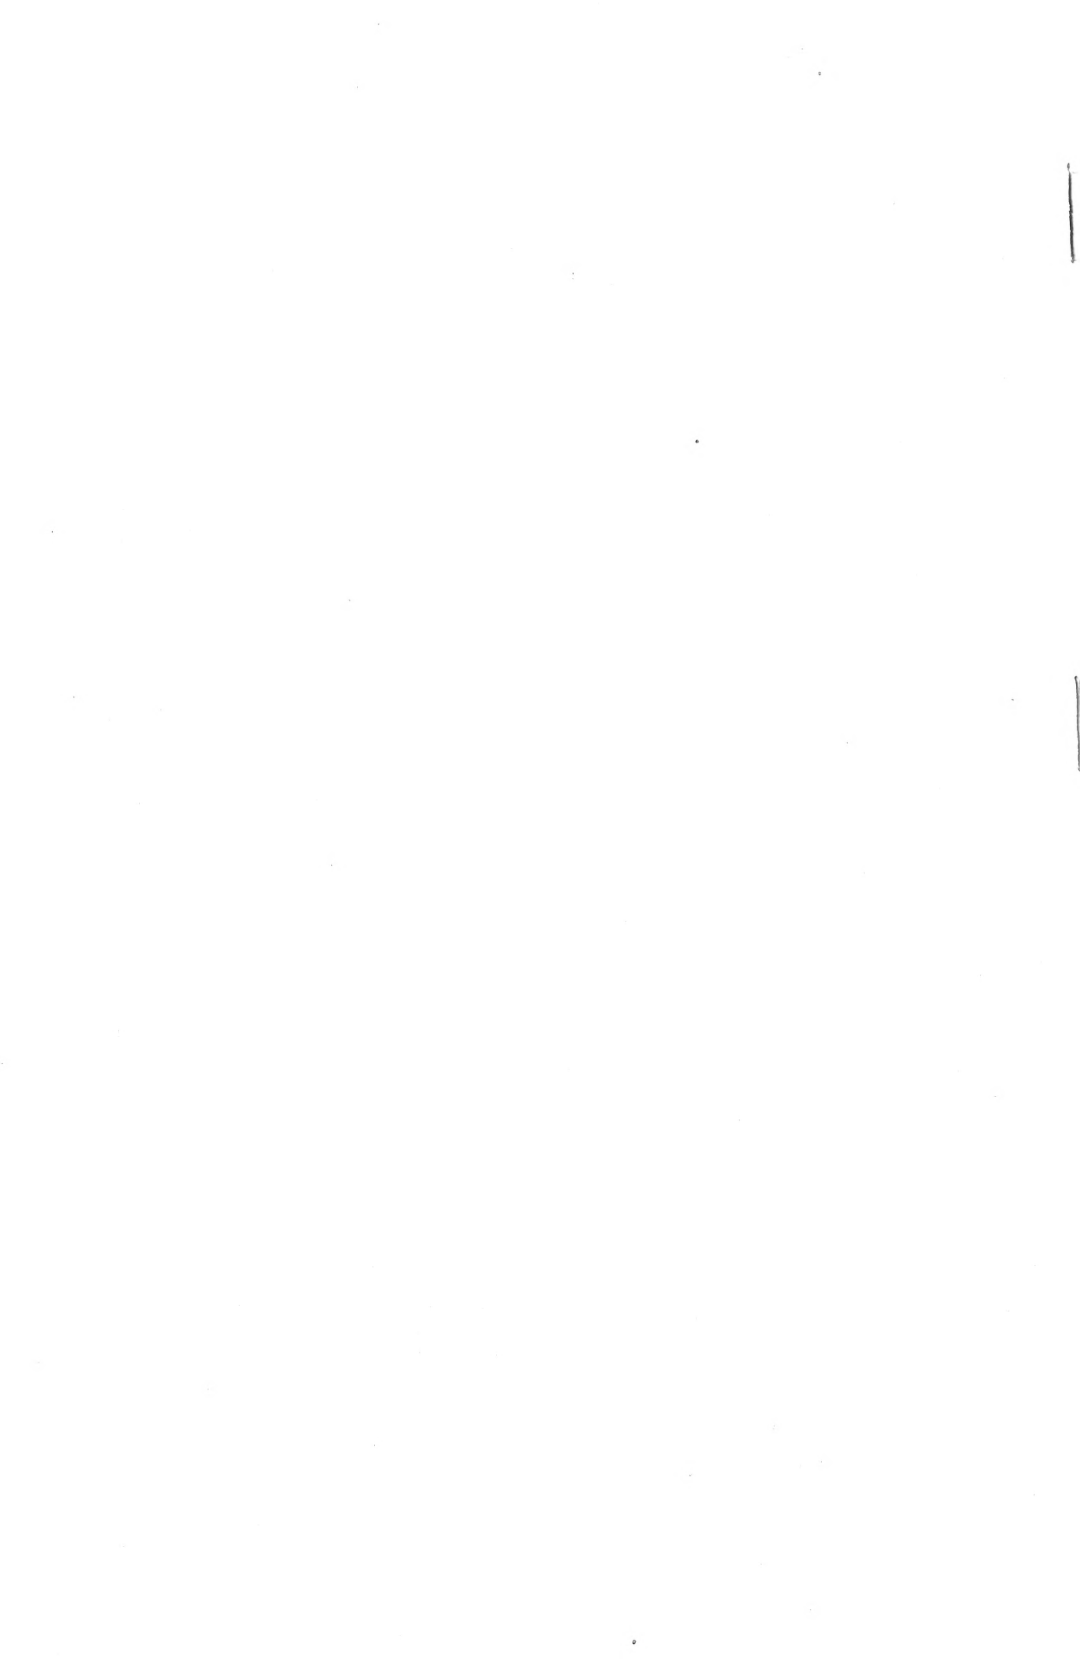

BEGINNING our 47th year in business at 164-168 State Street, once again we extend a cordial greeting to our old friends and new.

During the past year, in the Connecticut Valley where most of us live, weather conditions have been on the whole favorable and the farmer has produced good crops, especially has this been true of the tobacco growers who have brought through a sound crop of good quality and weight and at this writing every indication points to good returns in dollars and cents. It has been truly said "America's greatness its prosperity, its future, the strength of its financial structure depend more upon agricultural production than on any other single factor." With a good year behind us everyone should take a fresh grip and determine to make the year 1924 the best ever. We are prepared to do our part.

The greatest asset of our business is the confidence reposed in us by our friends and customers and our greatest care is to so conduct our business that we may merit a continuance of this confidence.

Our motto "Do to others as you would that others do to you."

OLDS & WHIPPLE, INC.

SEED, FERTILIZER

AND

AGRICULTURAL IMPLEMENT CATALOG

For 1924

FERTILIZER FACTORY:

Tolland Street, East Hartford, Conn.

MAIN OFFICE AND IMPLEMENT WAREHOUSE:

164-6-8 State St., Hartford, Conn.

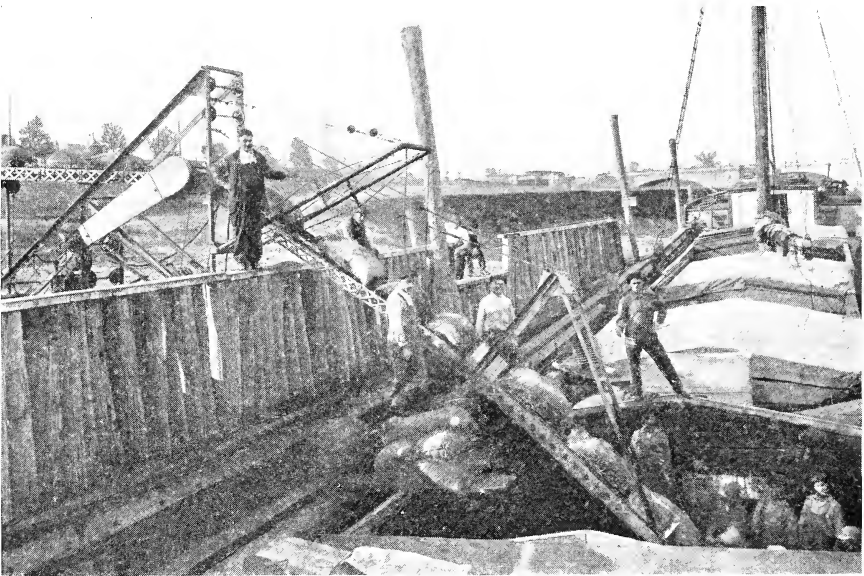

OLDS & WHIPPLE, Inc.

NOTE: Stop at State Street Office and secure a written order on Warehouse for fertilizers.

Our Fertilizer Factory and Storage Sheds, Tolland St., East Hartford.

This plant built in 1920 is second to none in New England. Equipped with modern machinery which enables us to guarantee thorough mixing and best mechanical condition of our fertilizers.

Unloading Fish Scrap

This material comes to us in boats from various parts along the Atlantic coast. We handle thousands of tons of Dry Ground Fish.

Olds & Whipple, Inc.

List of Fertilizers and Raw Materials for 1924

O. & W.'s Special Fertilizers

| Lime for Agricultural use. | Tankage. |
| Fine ground Nova Scotia Plaster. | Steamed Bone. |
| High Grade Muriate Potash. | Precipitated Bone Phosphate. |
| High Grade Sulphate Potash | Poultry Manure. |
| Kainit. | |

A WORD ABOUT FERTILIZERS.

Fertilizer prices for the year 1924 are practically the same as in 1923. Through the trying period of the last few years, trying to the fertilizer manufacturer as well as to the farmer as evidenced by the tremendous losses they have sustained, prices have been held to a moderate advance in spite of rapidly increasing labor costs. We have endeavored to co-operate with our farmer customers by extending credit, accepting deferred payments and in every other way within our power, realizing that the Conn. Valley Tobacco Asso., Inc., was marketing its first crop under their contracts with the grower and the grower was getting his money at a later date than usual.

From this time on we look for improved conditions and an easing of the pressure welcome to all.

We would urge our customers to order their fertilizer early and accept early delivery. The tendency among buyers of fertilizer during the past few years has been to put off ordering until late in the season, especially those who are accustomed to haul it by wagon or auto truck from our factory. This causes great congestion at our factory during April and May and sometimes inconvenience and delay. Fertilizer will keep in your tobacco shed just as well as it will in our warehouse, and if you haul early it is there the day it is wanted. We therefore urge our customers to cooperate with us to the extent of accepting early deliveries.

Our Special Mixtures for all Crops

The following pages give you a list of the special fertilizers which we manufacture at our own factory.

These special mixtures are from tested formulae, proved out by practical growing tests. They are finely ground, and mechanically, in such condition, as to render them readily available to the growing crops.

Their use will repay you. They produce the kind of crops that pay. Used and endorsed by best growers.

O. & W. Complete Tobacco Fertilizer

Thousands of tons of this formula are used up and down the Connecticut Valley, proved to be the best by years of experience. While we make many special formulae to suit the ideas of our customers, O. & W. COMPLETE leads them all in popularity. This formula is the result of years of experimenting on our own farms and is endorsed by buyers of the leaf which is the strongest kind of recommendation. No tobacco fertilizer can be made better.

GUARANTEED ANALYSIS { 5 to 6% Ammonia.
3 to 4% Available Phosphoric Acid.
5 to 6% Actual Potash.

Our Blue Label Brand Tobacco Fertilizer

This fertilizer carries 1000 lbs. of C. S. Meal in every ton, put up for the grower who desires a large amount of meal under his tobacco crop. The phosphoric acid and potash are derived from the same high grade sources as our Complete Tobacco Fertilizer.

We have increased the potash content 1% over last year.

GUARANTEED ANALYSIS { 6 to 7% Ammonia
3 to 4% Available Phosphoric Acid
6 to 7% Actual Potash

O. & W. High-Grade Tobacco Starter

This high grade starter has been used with conspicuous success by some of our best growers in the valley. We recommend that it be applied after the first time hoeing. At that critical stage of growth an abundant supply of quickly available ammonia enables the plant to get a vigorous start, overcome and grow away from any unfavorable condition that may exist.

Experience has taught us that the crop that grows quickly, vigorously and does not stop until it reaches maturity produces the best goods.

Apply about 500 lbs. per acre.

Guaranteed Analysis { 10 to 11% Ammonia.
3 to 4% Available Phosphoric Acid.

O. & W. Bone and Potash Compound

This formula has been extensively used with conspicuous success during the past few years. It is recommended for use with Cottonseed Meal or Castor Pomace for the tobacco crop. It contains the elements of plant food which the above materials lack, namely, available phosphoric acid and potash and when used with meal makes a complete fertilizer. We recommend 1000 to 1500 lbs. per acre.

GUARANTEED ANALYSIS { 4 to 5% Available Phosphoric Acid.
15 to 16% Actual Potash.

O. & W. High Grade Starter and Potash Compound

This formula is the same as the above with the addition of 5 per cent quickly soluble ammonia and should be used with Cottonseed Meal or Castor Pomace on such tobacco lands as need a starter. The ammonia of C. S. Meal and Pomace is slow acting and on some lands a more quickly soluble form of ammoniate is needed to start the crop. It should be used as our Bone and Potash Compound, 1000 to 1500 lbs. per acre.

GUARANTEED ANALYSIS { 5 to 6% Ammonia.
4 to 5% Available Phosphoric Acid.
15 to 16% Actual Potash.

O. & W. Complete Corn, Potato and Onion Fertilizer

This is one of our high grade special mixtures for use on Corn, Potato, Onion Crops, Market Garden and general purpose fertilizer.

The sources of plant food are such as are exceedingly available to the plant and best suited to promoting rapid and vigorous growth. Tested at our own farms we are able to speak authoritatively as to its merits. All growers will be repaid by using this special mixture on their Crop.

Our soils are well adapted to the culture of these Crops and to make them profitable as well, is an easy matter if the culture is supplemented and promoted by the use of our special fertilizer.

GUARANTEED ANALYSIS { 4 to 5% Ammonia.
8 to 9% Available Phosphoric Acid.
4 to 5% Actual Potash.

O. & W. Special Corn, Potato and Onion Fertilizer

This special fertilizer mixture is a great favorite in the big onion districts in Massachusetts and Connecticut. In its preparation, regard for the needs of the onion crop both as to growth and quality, have been considered, and the result is a mixture best suited to the plants needs.

Give this mixture of ours a trial and its use will convince you of our claims for it. Endorsed by best growers.

Guaranteed Analysis as follows:

3 to 4% Ammonia.
8 to 9% Available Phosphoric Acid.
2 to 3% Actual Potash.

O. & W. High Grade Potato Fertilizer

This is a concentrated mixture running high in analysis in every ingredient, and as a formula, is extensively used in the potato growing sections of Maine. To produce large crops of potatoes you must feed heavily of Potash. This was thoroughly proven during the war, as even when Potash was extremely high and scarce some of the Maine potato growers paid the price for this ingredient and were well repaid by increased crop.

GUARANTEED ANALYSIS { 5 to 6% Ammonia.
8 to 9% Available Phosphoric Acid.
7 to 8% Potash.

O. & W. Seeding Down Mixture for Grass

Designed to be used when seeding for permanent mowing, running high in every ingredient, and furnishing the essential things for a permanent fertilizer, namely, phosphoric acid and potash.

GUARANTEED ANALYSIS { 6 to 7% Ammonia.
8 to 9% Available Phosphoric Acid.
6 to 7% Actual Potash.

O. & W. Top Dressing for Grass

We recommend to be used from 300 to 600 lbs. per acre in the Spring as a top dressing on mowing lots. Made of quickly soluble materials, it can be applied with advantage as late as June 1st.

GUARANTEED ANALYSIS { 7 to 8% Ammonia.
4 to 5% Available Phosphoric Acid.

O. & W. Fish and Potash Crossed Fish Brand

An old time favorite brand for corn, cabbage, onions, etc. Especially adapted for light soils. This was a favorite fertilizer of our Daddy's, and rightly so.

GUARANTEED ANALYSIS { 3 to 4% Ammonia
6 to 7% Available Phosphoric Acid
5 to 6% Actual Potash.

Agricultural Lime

Lime is necessary on many soils to correct acidity and to render available the inert plant food present. We are, however, of the opinion that liming may be easily overdone, that constant application would tend to make the soil alkaline. We offer lime in two forms; Agricultural Lime, which is the flakings at the lime kilns and is made up partly of airslacked lime and also contains some lime that is not thoroughly airslacked. We offer this in carload lots in bulk or bags and in bags less car lots. We can also furnish Ground Limestone in car lots, bulk or bags and in bags less car lots.

Prices on Lime and all fertilizer mixtures on application.

~~As~~ Owing to unsettled conditions the prices on all goods in this catalogue are subject to change without notice.

DESCRIPTIVE CATALOGUE and PRICE LIST
OF
Garden and Farm Seeds,
Agricultural Implements and
Fertilizers
for 1924

WE DO NOT WARRANT SEEDS

The fact that no reputable seedsman now warrants seeds in any respect being well known renders it unnecessary for us to say very much on this point, as it must be apparent to every intelligent person that no seedsman can afford to send out poor or worthless seeds. There could be no more certain ways of destroying his business. We beg to append the following notice:

The seeds offered in this catalogue have been carefully selected from most reliable sources and we believe them to be first-class in every respect, but we cannot guarantee the crop as too many conditions enter into it. Therefore we give no warranty, expressed or implied, as to description, purity, productiveness, or any other matter of any seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are to be returned at once, and if any money has been paid for them it will be refunded.

OLDS & WHIPPLE, INC.

MAIL ORDERS AND SHIPMENTS

Prompt attention to orders by mail. Mailing blank is enclosed in Catalogue to render this service more convenient. Be particular in giving name and address. The new system of Parcel Post enables us to make shipment of large packages by mail.

SEEDS BY MAIL

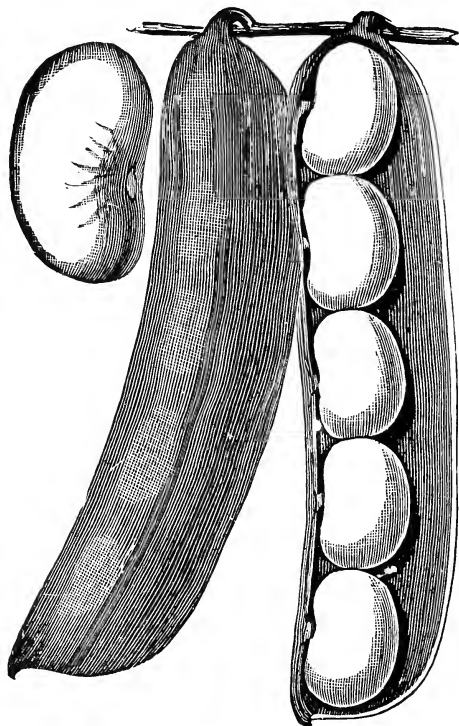

We will pay postage on seeds in packets, ounces, or by pound, with these exceptions; peas, beans, corn, onion sets, grain and grass seeds, which necessitate an extra charge of 5 cents per pound.

ASPARAGUS

An Asparagus bed may be made from one or two year old roots, planted in fall or spring. Plant the roots in rows four feet apart, leaving about twelve inches between plants in the row. Should be planted in trenches and gradually filled in as plants grow. Seeds may be sown in April in drills one foot apart and one inch deep. One ounce of seed will sow sixty feet of drill.

| | Per Pkt. | Per ¼ lb. | Per lb. |
|--|----------|-----------|---------|
| Donald's Elmira.—Stalks bright green color, of mammoth size, tender and succulent, | \$0.10 | \$0.20 | \$0.75 |

| Conover's Colossal Roots.—Fine, large, 2 year old and fresh dug. | | Per 100, | .75 |
| Palmetto Roots.—Fine, 2 year old. | | Per 100, | .75 |

BEANS—Dwarf or Bush

To produce a regular succession of crops through the season, plant every two weeks, from about beginning of May to end of summer. Plant in rows 18 inches apart, two inches deep; cultivate only when soil is dry, as the scattering of earth on vines will cause them to rust. One quart will plant 100 feet of drill and one and one-half bushels for one acre.

BEANS

Owing to extremely unfavorable weather conditions, the bean crop is very short, some varieties were almost a total crop failure. Stocks are scarce and prices high.

| | Per lb. | 5 lb. Lot Per lb. | 15 lb. Lot Per lb. |
|---|---------|----------------------|-----------------------|
| Burpee's Bush Lima. | | | |
| Burpee's Bush Lima.—A true bush form and immense cropper, | \$0.35 | \$0.30 | \$0.25 |

| Improved Rust Proof, Golden Wax. —Early, long, round, stringless pods, | \$0.35 | \$0.30 | \$0.25 |
| Early Golden Eyed Wax. —Hardy and prolific, flat pods, early, | .35 | .30 | .25 |
| Black Wax, Prolific. —Very early, round thick pods, | .35 | .30 | .25 |
| Wardwell's Kidney Wax. —Early, flat long wax pods, very fine, | .35 | .30 | .25 |
| Early Valentine. —Improved, true round green pod, | .35 | .30 | .25 |
| Early Yellow Six Weeks. —Flat green pods, | .30 | .27 | .25 |
| Early China or Red Eye. —A productive variety, green pod, | .30 | .27 | .22 |
| Horticultural or Cranberry. —Green pod, a superior shell bean, medium early, | .35 | .30 | .25 |
| Low's Champion. —Large green flat stringless pods, | .40 | .35 | .30 |
| White Kidney. —An excellent shell bean and for baking, green pod, | .30 | .25 | .20 |
| White Marrow. —A fine winter bean, | .30 | .25 | .20 |
| Boston Favorite. —A large late dwarf horticultural, | .35 | .30 | .25 |
| Red Kidney. —An excellent shell bean, similar to White Kidney, | .30 | .25 | .20 |

BEANS—Pole

Plant in hills three to four feet apart, putting four or five beans in a hill, and leaving space in the center for the pole. One quart of limas will plant 100 hills. One quart of the smaller seeded sorts will plant about 200 hills.

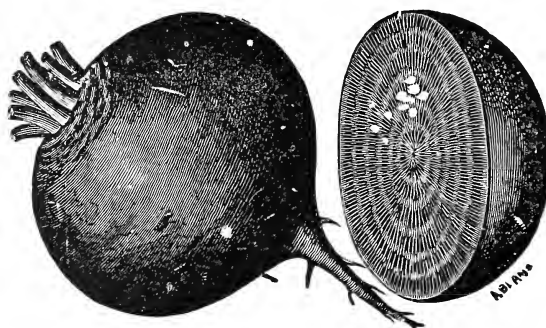

| | Per lb. | 5 lb. Lot Per lb. | 15 lb. Lot Per lb. |
|---|---------|----------------------|-----------------------|
| Extra Early Jersey Lima. —An early and large variety, | \$0.35 | \$0.30 | \$0.25 |
| Lima, Large White. —An old and choice variety, | .35 | .30 | .25 |
| Lima, King of the Garden. —Large and extremely productive, | .35 | .30 | .25 |
| Early Caseknife. —Long green and flat pods, used as shell and snap bean, | .30 | .26 | .22 |
| Horticultural Cranberry. —Excellent quality, | .35 | .30 | .25 |
| Early Golden Cluster Wax Pole. —Early golden pods, large and tender, | .40 | .35 | .30 |
| Kentucky Wonder. —Green pod, very prolific, | .40 | .35 | .30 |

BEETS—Table Varieties

Sow from April to beginning of July, in drills about one foot apart, covering seeds about one inch. Thin the young plants when suitable size for greens to six or eight inches apart. One ounce sows 50 feet of drill, 5 to 6 pounds to one acre.

| | Per pkt. | Per oz. | Per lb. |
|--|----------|---------|---------|
| Early Wonder. —Deep red, round, very popular with market gardeners, | \$0.05 | \$0.15 | \$1.10 |
| Crosby's Egyptian. —Early smooth and fine quality, | .05 | .15 | .90 |
| Edman's Extra Early. —One of the best, | .05 | .10 | .75 |

| | Per pkt. | Per oz. | Per lb. |

| Early Egyptian. —Good color, a smooth turnip beet, | .05 | .10 | .70 |
| Early Bassano. —Earliest of all, flesh nearly white, | .05 | .10 | .70 |
| Detroit Dark Red. —Smooth, bright red, good keeper, | .05 | .10 | .75 |

Dewing's Early Blood Turnip.

| | | | |
|--|-----|-----|------|
| Bastian's Early Blood Turnip. —A quick large growing sort, of good color, | .05 | .10 | .70 |
| Dewing's Early Blood Turnip. —A standard variety of excellent quality, | .05 | .10 | .75 |
| Long Smooth Blood. —An excellent late variety for winter use, | .05 | .10 | .70 |
| Swiss Chard. —Fine for greens, cultivated solely for leaves, | .05 | .15 | 1.00 |

MANGOLD WURZEL

Sow in May or June in rows, 18 inches to 2 feet apart, and thin to 8 inches in the row. The value of these for stock feeding cannot be over estimated. Sow 6 to 8 pounds to one acre.

| | Per pkt. | Per oz. | per lb |
|--|----------|---------|--------|
| Carter's Mammoth Long Red. —A heavy cropper, one of the best, | \$0.05 | \$0.10 | \$.60 |
| Norbiton Giant Long Red. —Very productive, | .05 | .10 | .60 |
| Yellow Globe. —Large globular formed roots, good for shallow soils, | .05 | .10 | .60 |
| Giant Half Sugar. —Rose shape and similar to Norbiton Giant, | .05 | .10 | .60 |
| Golden Tankard. —A half-long variety of bright yellow color, | .05 | .10 | .60 |
| White Sugar, Lane's Improved. —A well known variety, | .05 | .10 | .40 |

Mangold seed in 5 pound lots, 30 cents a pound.

BROCCOLI

A vegetable resembling Cauliflower but much hardier. Requires the same general culture as cabbage. One ounce of seed produces about 1,500 plants.

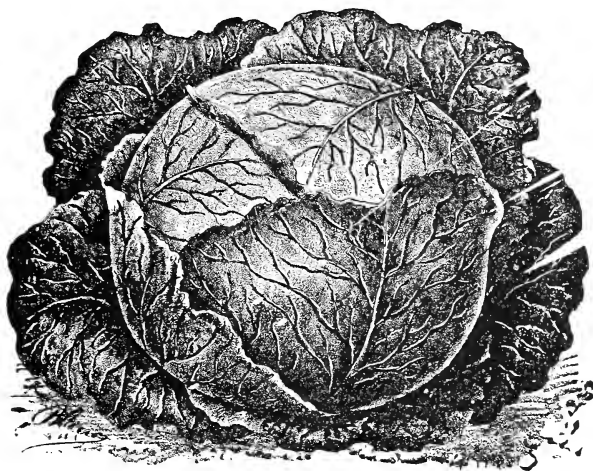

| | Per pkt. | Per oz. |
|---|----------|---------|
| Purple Cape. —Medium size heads, hardy, | \$0.10 | \$0.35 |
| White Cape. —Like Purple Cape, but of cream white color, | .10 | .35 |

BRUSSELS SPROUTS

A species of cabbage family and cultivated in about same manner. One ounce of seed will produce about 1,200 plants.

| | Per pkt. | Per oz. |
|--------------------------|----------|---------|
| O. & W.'S Best | \$0.05 | \$0.25 |

CABBAGE—Early

All Seasons.

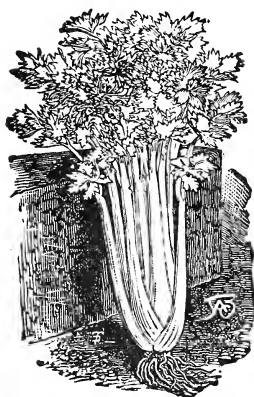

All the Cabbage family require rich, deep, well-drained soil. For the early kinds, plant in rows 30 inches apart and 16 inches between the plants. For the late varieties, three feet between the rows and two feet between the plants. For very early use, sow in January or February in hot-beds. Set out when plants are strong enough into other hot-beds or set in cold frames in March. Transplant when danger from frost is past to open ground. The late, or winter crop seed can be sown in May and the plants set out when large enough.

To destroy the green worm that attacks the cabbage plant, use a solution of one ounce of saltpetre in three gallons of water. One ounce of seed will produce about 3,000 plants, one-quarter pound for one acre.

| | Per pkt. | Per oz. | Per lb. |
|--|----------|---------|---------|
| Copenhagen Market.—Extra early round hard head | \$0.10 | \$0.25 | \$4.00 |
| Early Jersey Wakefield Extra.—A fine, very early medium sized market favorite, | .10 | .25 | 3.00 |
| Early Summer.—A superior, second early, heads large and solid, | .10 | .25 | 2.75 |
| Early Flat Dutch.—A fine early variety for family use, . . | .10 | .25 | 3.00 |
| Early Winnigstadt.—A medium early conical shaped head, . | .10 | .25 | 2.50 |
| Fottler's Brunswick.—A short stemmed early drumhead, . | .10 | .25 | 2.75 |
| All Seasons.—Medium early, very large and sure header, . | .10 | .25 | 3.00 |

CABBAGE—Late Varieties

| | Per pkt. | Per oz. | Per lb. |
|---|----------|---------|---------|
| O. & W. Premium Flat Dutch. —An extra fine selection of the large late Flat Dutch, | \$0.10 | \$0.25 | \$2.75 |
| Improved American Drumhead Savoy. —Large, fine quality, excellent winter cabbage, | .10 | .25 | 3.00 |
| Stone Mason Drumhead. —A large round solid variety, | .10 | .25 | 3.00 |
| Red Dutch Drumhead. —Fine solid dark red heads, | .10 | .25 | 3.00 |
| Hollander, or Danish. —A superior winter variety, heads round, very hard, fine and tender, | .10 | .25 | 3.00 |
| Sure Head. —Large growing, fine heading, solid and large, | .10 | .25 | 2.75 |

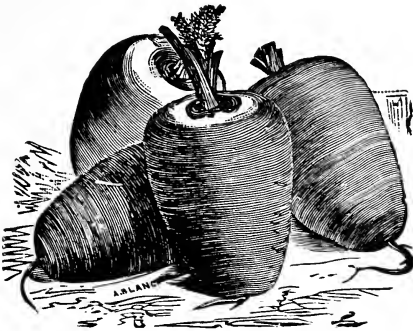

Paris Golden

CELERY

Sow seed about the first of April in hot-bed or cold frame. Transplant four inches apart, when three inches high in rich soil; water and protect until well rooted, then transplant into rows 5 or 6 feet apart either on surface or in trenches 8 inches deep. Set the plants 10 or 12 inches apart. To blanch draw earth around the plants from time to time.

One ounce of seed will give about 4,000 plants.

| | Per pkt. | Per oz. | Per lb. |
|--|----------|---------|---------|
| Paris Golden, Self Blanching, (French.) —An early golden variety, very popular, | \$0.15 | \$.75 | \$10.00 |
| Boston Market. —One of the best varieties in cultivation, | .10 | .30 | 3.00 |
| Celeriac. —Turnip rooted, used for salads and soups, | .05 | .25 | 2.50 |
| White Plume. —Easily bleached, usually solid and of a pleasing nutty flavor, | .05 | .30 | 3.00 |
| Winter Queen. —One of the best winter varieties, | .10 | .30 | 3.00 |
| Giant Pascal. —Second early, crisp, fine quality, | .10 | .30 | 3.00 |

CARROT

Carrots thrive best in rather light loam; soil should be well cultivated and well fertilized. Plant in rows 14 inches apart, and thin plants to 3 to 5 inches in the rows. Plant from the middle of April to the middle of May.

One ounce will sow 100 feet of drill. 3 to 4 pounds to one acre.

| | Per pkt. | Per oz. | Per lb. |
|---|----------|---------|---------|
| Geurande, or New Ox Heart. —An intermediate variety, . | \$0.05 | \$0.10 | \$1.00 |
| Danvers Half Long. —A most desirable variety, great keeper, . | .05 | .10 | 1.00 |
| Improved Long Orange. —A large long rooted variety, for stock purposes, . | .05 | .10 | 1.00 |
| White Belgian. —Large, white, productive, for stock, . | .05 | .10 | .75 |
| Early Scarlet Horn. —An early short variety for forcing, excellent for table, color deep orange, . | .05 | .10 | 1.00 |
| Early Half Long Scarlet. —Stump-rooted, coreless, red color, . | .05 | .10 | 1.00 |
| Chantenay. —A half-long, one of the finest for table use, . | .05 | .10 | 1.00 |

CAULIFLOWER

Is one of the most delicious varieties of the Cabbage family. Requires a rich deep soil, a low moist situation being desirable. Plants should be set in rows about 2 feet apart and 18 inches between the plants.

One ounce will sow a bed of 40 square feet and produce about 2,000 plants.

| | Per pkt. | Per ¼ oz. | Per oz. |
|--|----------|-----------|---------|
| Henderson's Snowball. —This ranks extremely high among the early varieties, it is a reliable header of good size and of rich white color, . | \$0.20 | \$0.75 | \$2.00 |
| Erfurt Early Dwarf. —A good variety, . | .20 | .75 | 2.00 |
| Early Paris. —A standard early variety, . | .10 | .45 | 1.40 |

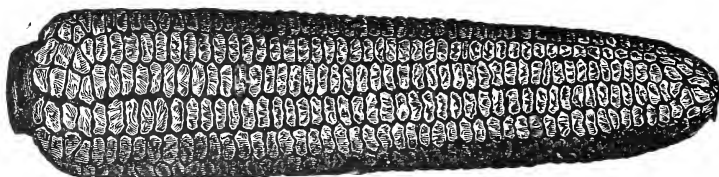

CORN—Sweet

Requires a rich warm soil. For early varieties plant when ground has become well warmed; successive plantings may be continued until July. Plant in hills from 3 to 3½ feet apart, according to the height of variety.

One quart will plant 200 hills; 8 quarts for one acre in hills.

| | Per lb. | 5 lb. Lot Per lb. | 15 lb. Lot Per lb. |
|---|---------|----------------------|-----------------------|
| Early Maine. —An extra early variety, . | \$0.25 | \$0.20 | \$0.18 |
| Extra Early Cory. —One of the leading extra early market varieties, . | .25 | .20 | .18 |
| White Cob Cory. —Similar to Early Cory; less hardy, very satisfactory, . | .25 | .20 | .18 |
| New Champion. —Fine early quality with large ears, . | .25 | .20 | .18 |
| Early Minnesota. —One of the second early sorts, ears of good size, . | .25 | .20 | .18 |

| | Per lb. | 5 lb. Lot Per lb. | 15 lb. Lot Per lb. |
|--|---------|----------------------|-----------------------|
| Howling Mob — | \$0.25 | \$0.20 | \$0.18 |
| Crosby's Early .—An old favorite, early and of excellent quality, | .25 | .20 | .18 |
| Country Gentleman .—A rich, sweet, deep kerneled variety, with small cob, | .25 | .20 | .18 |

Early Maine.

| | | | |
|---|-----|-----|-----|
| Squantum .—Perhaps one of the best and sweetest for main crop, | .25 | .20 | .18 |
| Evergreen .—A standard late variety, | .25 | .20 | .18 |
| Mammoth Sugar .—Extra large sweet variety, of good quality, | .25 | .22 | .18 |
| Black Mexican .—An early, tender corn of fine flavor, | .30 | .25 | .20 |
| Golden Bantam .—A yellow sweet corn, extra early and extra hardy, very tender and sweet, | .30 | .23 | .20 |
| Golden Giant .— | .30 | .23 | .20 |

CORN—Field

(Prices subject to market changes.)

| | |
|--|---------------------|
| Eureka .—A well known ensilage variety of White Corn. Very leafy, of extra large growth, and we believe will produce more tons of silage than any other variety. For Ensilage only, | } at market prices. |
| Leaming's Early Dent .—A very popular Dent Corn, grown for both grain and Ensilage. This variety will mature in this latitude, | |
| Mastodon Early .—Large, free growing, very productive, | |
| Longfellow .—A yellow flint corn, a well and favorably known variety, | |
| Early Canada Improved .—A ninety day yellow flint corn. An old Standard variety grown for grain, | |
| Canada Red .—A red flint corn developed at our Suffield farm. Early and productive, | |

Use O. & W. Special Corn, Potato and Onion Fertilizer

CRESS

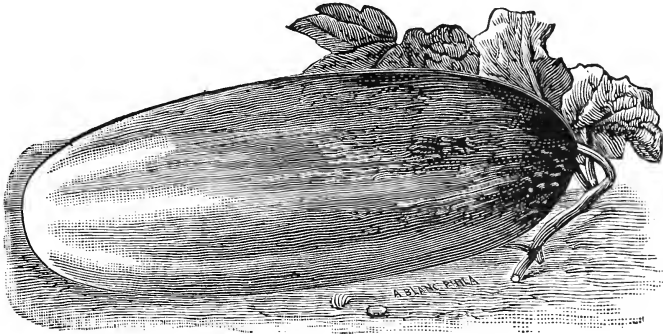

To be planted in drills and sown quite thickly, on good rich ground, in early spring.

| | | | |
|---|----------|---------|---------|
| One ounce of seed will plant 100 feet of drill. | Per pkt. | Per oz. | Per lb. |
| Curled .— | \$0.05 | \$0.10 | \$0.75 |

CUCUMBER

First planting should be made in May when ground is dry and warm, in hills about 4 feet apart; thin out to 3 to 4 plants to the hill when established. For pickles plant during the last two weeks in June.

One ounce will plant 50 hills; two pounds for one acre.

Improved Early White Spine.

| Davis Perfect. —Dark green, good length, popular. | .05 | .10 | 1.20 |
| Snow Pickling. —One of the best pickling, | .05 | .10 | 1.00 |
| Improved Early White Spine. —A standard variety of uniform good size and color, | .05 | .10 | 1.00 |
| Green Prolific. —The very best pickling sort, | .05 | .10 | 1.00 |
| Boston Pickling. —Produces an abundant crop of dark green color, | .05 | .10 | 1.00 |
| London Long Green. —A large and late variety, | .05 | .10 | 1.15 |

DANDELION

Sow in May in drills 12 inches apart, covering seeds about one-half inch deep. Cultivate to keep down weeds during summer and the following spring leaves will be suitable for cutting. Must be covered in winter to protect from frost.

One ounce for 100 feet of drill. One pound for one acre.

| | Per pkt. | Per oz. | Per lb. |
|--|----------|---------|---------|
| Improved Thick-Leaved. —Standard sort, very productive, | \$0.25 | \$0.75 | \$10.00 |
| French Garden. — | .15 | .35 | 4.00 |

EGG PLANT

Plant the seed in hot beds early in spring. Transplant when two inches high into another bed, or small pots. Plant in garden when weather is settled and warm. Should be placed about 3 feet apart, and well watered for 2 or 3 days, until they show signs of being rooted.

| | Per Pkt. | Per oz. |
|--|----------|---------|
| New York Improved Purple. —The leading market variety, excellent and very productive, | \$0.15 | \$0.50 |
| Black Beauty. —Early, fruit black, round and solid, | .15 | .50 |

ENDIVE

For early use, sow as soon as ground can be worked in spring in drills fifteen inches apart; thin plants to six inches in the row. Any ordinary soil will do, but a moist place is preferred. To blanch the leaves, gather them together when dry and tie with matting or cover with ordinary flower pots inverted.

One ounce will produce about 3000 plants.

| | Per pkt. | Per oz. | Per lb. |
|--|----------|---------|---------|
| Green Curled. —A standard sort, | \$0.05 | \$0.10 | \$1.00 |
| Moss Curled. —Very ornamental, | .05 | .10 | 1.00 |
| Batavian Escarolle. — | .05 | .10 | 1.10 |

KALE or German Greens

Plant the larger varieties in hills two by three feet apart and thin to one plant to the hill. Requires deep, rich soil. Set out plants in June and treat in same manner as for cabbage.

One ounce will produce 2,000 plants.

| | Per pkt. | Per oz. | Per lb. |
|--|----------|---------|---------|
| Green Curled Scotch. —Leaves of bright green, very tender and closely curled, | \$0.05 | \$0.15 | \$1.10 |
| German Greens. —To be sown in fall for spring use, | .05 | .15 | .90 |

KOHL RABI

An intermediate vegetable between the cabbage and turnip. Prepare as for cabbage. Sow in April in rows 18 inches apart and thin out to 8 inches apart.

One ounce gives 3,000 plants.

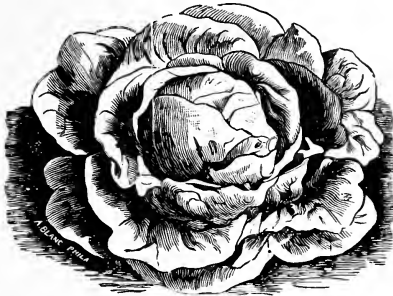

| | Per pkt. | Per oz. |
|---|----------|---------|
| Early White Vienna. —A standard early, | \$0.10 | \$0.20 |
| Early Purple Vienna. —Very large and productive, | .10 | .20 |

LEEK

Sow the seeds in April and transplant in July to rows 15 inches apart and 8 inches between plants.

One ounce will grow 1,000 plants.

| | Per pkt. | Per oz. | Per lb. |
|---|----------|---------|---------|
| American Flag. —A hardy and profitable sort, excellent for winter use, | \$0.10 | \$0.20 | \$2.00 |

Boston Market.

LETTUCE

Lettuce needs a rich and moist soil, should be sown in rows about 12 inches apart and the plants thinned to 10 inches apart for the heading varieties. When not grown for head they may be sown broadcast. The more rapid the growth, the better the quality.

One ounce for 3,000 plants.

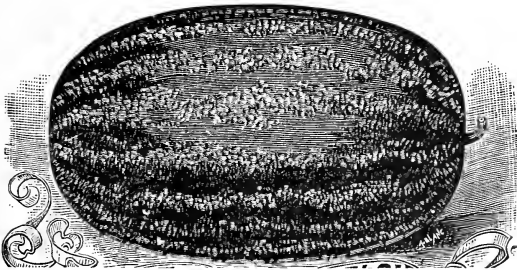

| | Per pkt. | Per oz. | Per lb. |
|---|----------|---------|---------|
| May King. —Medium size, early, good heading, a popular sort, | \$0.05 | \$0.15 | \$1.25 |
| Early Curled Silesia. —Sweet, early, good variety | .05 | .15 | 1.25 |
| Early Simpson. —Early, compact mass of tender leaves, | .05 | .15 | 1.25 |
| Black-Seeded Simpson. —Large light-colored head variety, | .05 | .15 | 1.25 |
| Boston Market. —Early, small heads, very hardy, | .05 | .15 | 1.25 |

| Early Yellow Cantaloupe. —Early, large and showy, | .05 | .10 | 1.00 |
| Miller's Cream. —Thick meated and salmon colored flesh, delicious, | .05 | .10 | 1.00 |
| Paul Rose. —An extra quality, salmon flesh, medium size, | .05 | .10 | .95 |
| Emerald Gem. —Small, but prolific, yellow meated, superior quality, | .05 | .10 | 1.00 |
| Osage, Salmon Fleshed. —A deliciously sweet melon of fine flavor, | .05 | .10 | 1.00 |

NASTURTIIUM

Cultivated for both use and ornament. Young seeds may be used as capers and leaves for salad purposes. The beautiful flowers, blooming freely all summer add a charm to the garden and lawn. Plant in May.

| | Per oz. | Per ¼ lb. | Per lb. |
|---|---------|-----------|---------|
| Tall. —An ornamental climber, | \$0.10 | \$0.25 | \$0.70 |
| Dwarf. —Fine for borders and beds, | .10 | .25 | .75 |

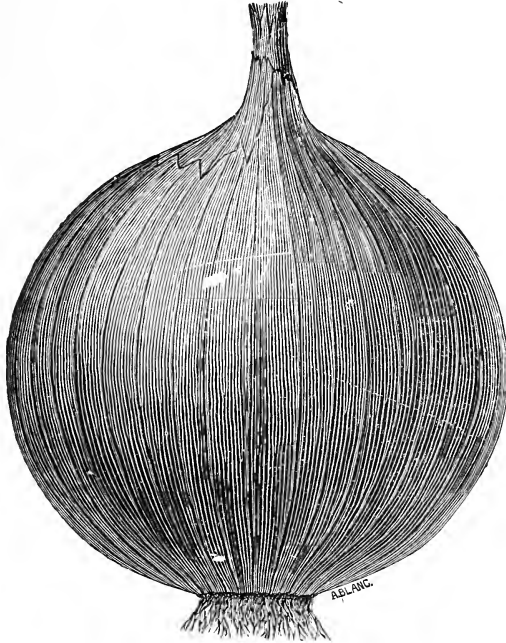

OKRA

Plant in rows 2 feet apart, thinning plants to 1 foot apart in the row.

| | Per pkt. | Per oz. | Per lb. |
|------------------------------------|----------|---------|---------|
| Dwarf Green.—Early and productive, | \$0.05 | \$0.10 | \$0.60 |

ONION

(Strictly new seed—Prices subject to change.)

Southport Red Globe.

O. & W. Complete Onion Fertilizer.

A fertilizer that will produce remarkable crops. Used by many of the best growers in Massachusetts and Connecticut.

The onion thrives best in deep, loamy soil, well fertilized. Sow the seeds thinly in drills 1 foot apart. Cover seeds about $\frac{1}{4}$ inch, roll and tread soil down solidly. When 3 inches high, thin out to 3 inches apart. Cultivate well and keep out weeds.

One ounce seed will sow 100 feet of drill. Six pounds for one acre.

The seed we offer is HOME GROWN and calculated to give greater satisfaction than western grown seed.

| | Per pkt. | Per oz. | Per lb. |
|--|----------|---------|---------|
| Extra Early Red.—Early, of flat shape, mild, | \$0.10 | \$0.20 | \$1.65 |
| Wethersfield Large Red.—A large yielder, excellent to keep, | .10 | .20 | 1.65 |
| Southport Red Globe.—Finest large red sort, | .10 | .20 | 1.70 |
| Southport Yellow Globe.—Handsome and late variety, | .10 | .20 | 1.70 |
| Yellow Globe Danvers.—One of the superior yellow globe varieties, | .10 | .20 | 1.65 |
| O. & W. Yellow Globe Danvers.—A fine selected strain of the Yellow Globe Danvers, specially grown for us: very choice, | .10 | .25 | 1.85 |
| Prize Taker.—Yellow skin, white flesh, good cropper, large size, | .10 | .25 | 1.85 |
| Southport White Globe.—Early, mild flavored, large, not a good keeper, | .10 | .25 | 2.50 |

ONION SETS

Should be planted as early as the ground can be worked in rows 12 inches apart. Set each about 3 inches apart. When onions are grown from sets they can be used in the green state in June, or will ripen by July.

| | | | | | | | |
|------------------------|---|---|---|---|---|---|---------------------|
| Red Top. | . | . | . | . | . | . | } at market prices. |
| White.—For rare-ripes, | . | . | . | . | . | . | |
| Potato. | . | . | . | . | . | . | |
| Yellow. | . | . | . | . | . | . | |

PARSLEY

Sow early in spring in drills 1 foot apart, covering lightly; thin out the plants to 3 to 4 inches apart; used for flavoring and garnishing. A single row forms a good edging for flower-beds or walks.

| | Per pkt. | Per oz. | Per lb. |
|--|----------|---------|---------|
| Moss Curled.—Very ornamental and productive, | \$0.05 | \$0.10 | \$0.75 |
| Curled, or Doubled.—A most beautiful variety, moss-like leaves of handsome bright green color, | .05 | .10 | .75 |

PARSNIP

Make the soil very fine and plant the seed very early, in rows eighteen inches apart, thinning plants to three or five inches in the rows; seeds should be covered about one-half inch deep.

Parsnips, aside from table use, have great value for stock feeding purposes. Are improved by allowing to remain in open ground through the winter.

One ounce to 150 feet of drill; five pounds for one acre.

| | Per pkt. | Per oz. | Per lb. |
|--|----------|---------|---------|
| Abbott's Improved Hollow Crown.—A great cropper, tender and sweet, | \$0.05 | \$0.10 | \$0.75 |
| Long Smooth White.—One of the best for general cultivation, | .05 | .10 | .75 |

PEAS

The wrinkled varieties, while the sweetest of all peas, are more liable to rot, being tender, and need to be planted thicker and later than the round, hard sorts. Soil needs to be well manured. Have the dwarf varieties in rows two and one-half feet apart; those kinds growing two to three feet high, in rows three feet apart, and the tallest in rows four feet apart. The smooth varieties may be sown as soon as ground can be worked; the wrinkled sorts when soil is well warmed.

One quart to 100 feet of drill: one and one-half bushels to an acre.

| | Per lb. | 5 lb. lots Per lb. | Lots of 15 lb. Per lb. |
|---|---------|-----------------------|------------------------------|
| Carter's Premium Gem. | | | |
| East Hartford Extra Early.—True stock, 2½ feet, best early variety in the market, smooth a riety. | \$0.25 | \$0.20 | \$0.17 |

| | Per lb. | 5 lb. lot Per lb. | 15 lb. lot Per lb. |
|---|---------|----------------------|-----------------------|
| Alaska. —Hard, blue pea, 2½ feet, extra early, | \$0.25 | \$0.20 | \$0.17 |
| Gradus, or Prosperity. —An extra early wrinkled pea, very large pods, of magnificent quality, | .30 | .25 | .22 |
| Carter's Premium Gem. —Wrinkled pea, about 12 to 15 inches high, very productive, early, | .30 | .25 | .20 |
| Bliss's American Wonder. —Very dwarf, early wrinkled pea, | .30 | .25 | .20 |
| Nott's Excelsior. —A wrinkled dwarf, of excellent variety, early, | .30 | .25 | .20 |
| Sutton's Excelsior. —Similar to Nott's Excelsior, but producing larger and more abundant pods, | .30 | .25 | .20 |
| Daisy or Dwarf Telephone. —Dwarf habit, wrinkled, large pods, second early, | .30 | .25 | .20 |
| Bliss's Everbearing. —Very productive, peas large and wrinkled, two and one-half feet high, | .30 | .24 | .18 |
| McLean's Advancer. —An old and choice variety, two and one-half feet high, wrinkled, | .30 | .24 | .18 |
| Heroine. —Medium early, wrinkled, two to three feet high, quality perfection, | .30 | .24 | .18 |
| Yorkshire Hero. —Large, wrinkled pea, tender and fine flavored, two and one-half feet high, | .30 | .24 | .18 |
| Thomas Laxton. —Of similar growth to Gradus, a few days later, pods are deep rich green. In the judgment of many the Thomas Laxton is even sweeter and finer flavor than Gradus. | .30 | .25 | .22 |
| Telephone. —Four feet high, large peas of rich, sugary flavor, | .30 | .25 | .20 |
| Champion of England. —An old standard variety, late, five feet high, | .30 | .25 | .22 |
| Canada Field. —For stock purposes, (60 lbs. to the bushel,) | | \$7.00 bushel. | |

PEPPER

Should be started in hot beds, and transplanted into open ground by end of May; set in rows eighteen inches apart and plants about twelve inches apart in the rows.

One ounce of seed will produce about 3,000 plants.

| | Per pkt. | Per oz. |
|---|----------|---------|
| Sweet Mountain. —Largely grown for both market and home use, | \$0.10 | \$0.60 |
| Bull Nose. —This has long been the standard sweet sort, | .10 | .60 |
| Ruby King. —Most popular large red pepper in cultivation, | .10 | .60 |
| Large Squash. —Thick fleshed, early and mild flavored, | .10 | .50 |
| Long Red Cayenne. —The true Cayenne, hot and pungent, | .10 | .60 |
| Small Red Cherry. —A small smooth and round variety; productive, | .10 | .60 |

PUMPKIN

To be cultivated in same manner as squash.

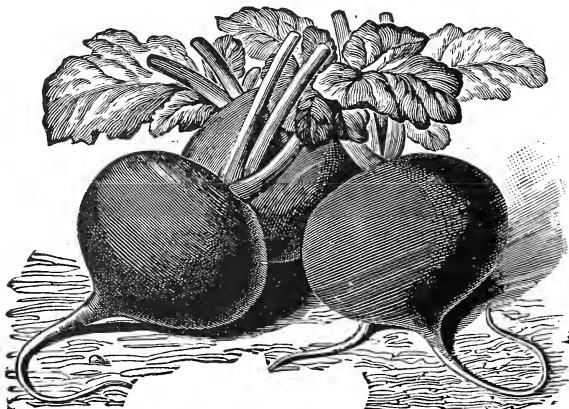

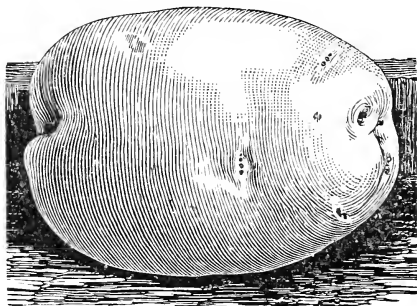

| | Per oz. | Per lb. |
|--|---------|---------|
| Small Yellow Sugar. —A handsome prolific variety, good keeper, best for pies, | \$0.15 | \$1.00 |
| Large Cheese. —Very large and good keeping variety, | .15 | 1.00 |
| Connecticut Yellow Field. —Grown largely for stock purposes, | .10 | .75 |

POTATOES—Northern Grown (Certified and Non-Certified)

Use eleven bushels, or four barrels per acre. (See pages 30 and 31 for description of varieties,) AT LOWEST MARKET PRICES.

You will note we have reduced the number of varieties of seed potatoes. We have retained the varieties of real merit and discarded only old and worn out seedlings.

Spaulding Rose
Irish Cobbler,
Carman 3,
Green Mountain (Improved)
Gold Coin,
Dibble Russet.

Deep Scarlet Turnip.

RADISH

For early use sow in spring as soon as ground can be worked. Sow in drills six to ten inches apart and thin out to one inch apart in the rows; as the roots are more tender and brittle when grown quickly, a rich light soil is preferred. For a succession sow every two weeks.

One ounce will sow 100 feet of drill; eight pounds for one acre.

| | Per pkt. | Per oz. | Per lb. |
|---|----------|---------|---------|
| Early Scarlet Turnip. —Round red with white tip, | .05 | .10 | 1.00 |

|--|----------|---------|---------|
| Deep Scarlet Turnip. —An all red standard variety, | \$0.05 | \$0.10 | \$1.00 |
| Early Long Scarlet, Short Top. —The standard early long variety, | .05 | .10 | 1.00 |
| French Breakfast. —Most popular variety, of olive shape, red with white tip, quick growing, | .05 | .10 | 1.00 |
| Scarlet Globe. —One of the best; quite early, very crisp, | .05 | .10 | 1.00 |
| White Turnip. —For summer and winter use, | .05 | .10 | 1.00 |
| Black Spanish Long. —Black skin, white flesh—a winter variety, | .05 | .10 | 1.00 |
| Round Black Spanish. —The favorite German winter radish, | .05 | .10 | 1.00 |
| Rose Color China Winter. —Grows large and tender, good for winter use, | .05 | .10 | 1.00 |

RHUBARB

Propagate from roots in richly prepared soil. Plants should be set five feet apart.

Victoria Giant— \$0.25 a root

SALSIFY, or Vegetable Oyster

Sow early in spring in light rich soil in drills fourteen inches apart and thin out to three inches apart in the row. The roots will be ready for use in October. When cooked the flavor resembles the oyster.

| | Per pkt. | Per oz. | Per lb. |
|---|----------|---------|---------|
| Sandwich Island Mammoth. —This variety grows to an unusually large size, roots tender and good flavor, | \$0.10 | \$0.20 | \$2.00 |

SPINACH

For very early spring use sow in August, for summer use sow in early spring, in drills about ten or twelve inches apart, covering the seed one inch deep. To obtain a succession sow at intervals of two weeks through the season. One ounce to 100 feet of drill, 10 pounds to one acre.

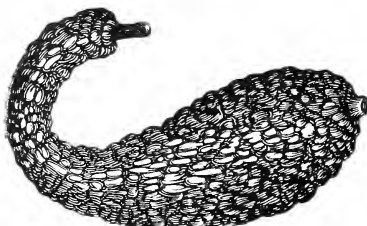

| | Per oz. | Per lb. |
|---|---------|---------|
| Round Thick Leaf. —Produces dark thick leaves, somewhat crumpled, | \$0.10 | \$0.35 |
| Large Viroflay. —Grows extra large size, | .10 | .35 |
| Long Standing, or Evergreen. —Latest in seeding, one of the best for garden use, | .10 | .35 |
| Savoy Leaved. —Early, wrinkled and hardy | .10 | .35 |
| New Zealand. —A very productive spreading plant, | .15 | .90 |

In lots of 5 lb. other than New Zealand 25c per lb.

SQUASH

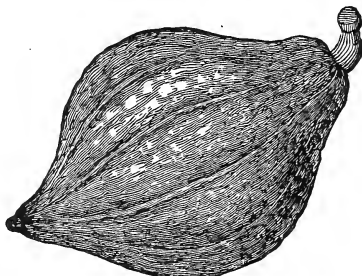

Requires rich, warm soil. Plant in hills nine to ten feet apart for running varieties, and five or six feet apart for bush sorts. Leave two or three plants to a hill. Cultivate frequently.

One ounce will sow twenty to forty hills; two to four lbs. per acre.

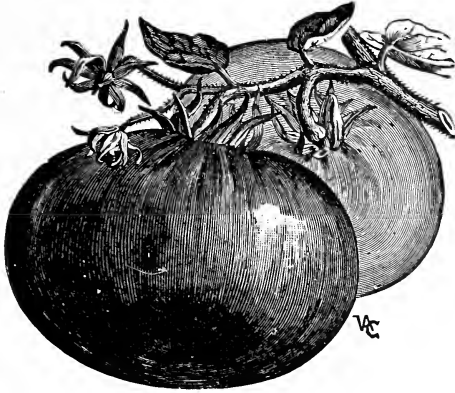

Summer Crookneck.

| | Per pkt. | Per oz. | Per lb |

TOBACCO

We are very careful in the selection of our tobacco seed, growing much of it on our own farm and saving the seed from only such plants as bear the correct type of leaf. We buy only of the most reputable growers. This seed is thoroughly blown which removes all the light seed, as we believe the heavier seed makes the strongest plants.

OUR COMPLETE FERTILIZER
FOR THE TOBACCO CROP.

O. & W. LAWN GRASS SEED

A Perfect Lawn Mixture.

Our lawn grass mixture is composed exclusively of the best seeds of the choicest fine bladed grasses free from weeds.

It will produce a rich, velvety lawn, an enduring, elastic turf. To get the best results proper drainage and thorough preparation of the soil is necessary; this being done our seed mixture assures a beautiful lawn.

We recommend sowing about one quart to a space fifteen feet square, or four bushels to the acre.

Price, Per qt., 30c. 2 qts., 55c. $\frac{1}{2}$ peck, 85c. Peck, \$1.60 Bushel, \$6.00

Alphano Humus

At Alphano, New Jersey, there is a wonderful deposit of humus so free from acid and so rich in plant foods that when properly drained and deeply cultivated it at once produces abundant crops. Alphano humus is an all-around soil builder and fertility producer. It is a black velvety enricher that is odorless and free from weed seeds. It comes to you in a dry, finely granulated form, making it easy to thoroughly mix with the soil. It is liberally supplied with nitrogen, phosphate, potash and lime, in both organic and mineral combination.

For new lawns spread on Alphano Humus at the rate of 200 pounds to every 1000 square feet and thoroughly mix with soil by raking, then seed and roll.

Get our booklet on this material showing how to make beautiful lawns.

In lots of 100 lbs. to 500 lbs., \$1.50 per cwt.

In lots of 500 lbs. to 2000 lbs., \$1.25 per cwt.

Ton lots and over, \$1.20 per cwt.

Our Lawn and Garden Fertilizer

For Spring and Early Summer Treatment

To maintain a luxuriant lawn, proper fertilizing is necessary.

The old method of applying stable manure, so objectionable because it carries weed seeds as well as being unsightly and odorous, is no longer practiced. We manufacture a lawn dressing carrying all the essential plant foods so necessary to produce luxuriant growth and dark, rich, green color so much desired.

We recommend for lawns that it be used at rate of 100 lbs. for 7,500 sq. ft. For gardens double the quantity.

A Selected List of Popular Flower Seeds

The cultivation of flowers well repays all the labor and care bestowed on them. Much of the disappointment attending unsuccessful cultivation could be overcome by careful planting and observance of those conditions of soil and growth peculiar to these sensitive plants. The soil should be mellow and well enriched with compost or fertilizer. If made into beds they should be well drained. The soil also requires to be made as fine as possible, not lumpy. Seeds should be covered in strict proportion to their size. The smaller seeds need little, if any covering.

After sowing they should be well *firmed* by pressing the surface with a smooth planed board. On each package directions are given specific to that kind.

SWEET PEAS

The Queen Flower of the Garden

A List of the Choicest Selected Named Varieties of the Famous Spencer Type of Sweet Peas.

For many years we have taken just pride in our sweet peas. This year we offer these separate named varieties of the Spencer sweet peas, whose wonderful coloring and form will surely prove a great delight to our customers. We shall have these separate varieties in bulk for those who desire to plant straight colors and also a mixture of these same varieties for those who wish to sow in this way. Everyone should try some of these famous Spencer Sweet Peas. You will be amazed at the beauty and showing they make.

Inoculate this
Seed with
HUMOGERM

Timothy, or Herd's Grass. One of, if not the commonest and best known grasses. Very valuable for hay. Perennial, fibrous and often bulbous rooted. (45 lbs. to the bushel.)

Red Top. Is a fine permanent grass. Often sown with timothy and red clover, in which case the clover soon disappears to be replaced by timothy, which in turn gives way to the red top. Very valuable in mixtures for permanent pastures.

Chaff Red Top 10 lbs. to the bushel. Fancy or cleaned 35 lbs. to the bushel.

Kentucky Blue Grass. Also called June grass. Root-creeping, perennial, flowers in June. It requires about two to three years to become well set and does not arrive at perfection as a pasture grass until the third or fourth season. (14 lbs. to the bushel.)

Orchard Grass. A perennial grass, flowers from June to July. Very valuable for pastures, also in connection with timothy and clover for hay crops. When used with timothy use one bushel orchard and 8 lbs. clover. If sown alone use three bushels to the acre. (14 lbs. to the bushel.)

Rhode Island Bent. Root-creeping, perennial, flowers in July. Very valuable for lawn purposes. Sow from three to four bushels to the acre. (10 lbs. to the bushel.)

Large Red, or Mammoth Clover. Grows from four to five feet high; stocks so coarse that cattle will eat but leaves only, but by its judicious use, exhausted lands may be reclaimed. (60 lbs. to the bushel.)

Medium Red Clover. The most important of all the varieties of clover for the practical purposes of agriculture. Sown with timothy and other grasses it produces desirable hay or pastures. (60 lbs. to the bushel.)

White Clover. The value of this clover is well known; it is found in most every natural pasture. It is adapted to all soils. Being deep-rooted it withstands drought when grown on dry, sandy sections. It should form a part of all mixtures for permanent pastures. (60 lbs. to the bushel.)

Alsike, (Clover). This is one of the hardy varieties. It resists cold, extreme drought and wet, and on rich warm soils yields immense crops of hay, or pasture of good quality. (60 lbs. to the bushel.)

Alfalfa (Clover). A heavy forage crop doing well in almost all localities. Requires well limed soil and good drainage.

Hungarian (grass) Millet. Splendid forage crop for light land. On rich land two crops may be grown the same season. Withstands drought and yields abundantly. (48 lbs. to the bushel.)

Golden, or German Millet. A heavier cropper than the Hungarian, and needs a longer season and a stiffer soil, stands up well, is easily cured, makes a coarse, harsh hay, which is greedily eaten by all kinds of stock. (50 lbs. to the bushel.)

Japanese Millet. This is by many considered the most valuable of all forage plants. It makes more hay than German millet or any other. Although it grows large, sometimes seven or eight feet high, the hay is of excellent quality. It is adapted to all sections.

HUMOGERM

Ensilage and Fodder

The productive capacity of the farm for stock purposes is greatly enhanced by the growing of silage crops.

It has become well known that by the feeding of silage there is a marked increase of profits to the dairy farmer.

We have a selected stock of seeds for silage and green fodder crops as listed below.

Eureka. The greatest of Ensilage varieties. A White Corn of extra large growth leafy and yielding immense returns for silage.

Leaming's Dent Corn. A very early and productive variety.

Mastodon Dent Corn. A strong growing, early, with large stalks and large grain.

Improved Canada Corn.—The standard yellow flint corn.

Longfellow Yellow Flint. A well known flint variety.

Canada Field Peas. Grown largely with oats as fodder crop. At market prices.

Leguminous Plants as Soiling Crops

All the leguminous plants (peas, clovers and beans, etc.,) have the power of taking up the free nitrogen in the air and converting it into available forms of ammonia so very valuable as a fertilizing ingredient to the soil.

Therefore the roots (or, as in some cases where the entire plant is turned under) provides a large supply of available ammonia for the crops which are to follow.

Northern Grown Certified Seed Potatoes

Grown for Seed by Seed Growers in Maine and Vermont

The Certified Seed we are offering this year has been carefully selected. Our representative visited Aroostook County, Maine, during digging season last October and inspected many fields. Our aim being to secure seed: 1st from disease free fields, 2nd from a vigorous yielding strain. Our Certified Green Mountains come from a field showing no late blight, good setting on stems and the State inspector notes relative to this particular field—*Conditions very good.*

Our representative was present at digging time and the field was yielding 180 barrels (495 bushels) per acre. One hill yielded 13 potatoes weighing 8 lbs. 2 ozs. We paid a premium for this particular field of Certified seed and this stock is worth a premium to any man who plants potatoes for profit.

Aroostook County has the natural Potato soil and an almost perfect Potato climate. This combination produces the heaviest crops.

According to the 1921 government reports, the Maine Potato Crop averaged nearly 300 bushels per acre. This is nearly double any other section, and three times the average yield of most states.

Northern Seed brought to our State, has a vigor that our own Potatoes do not have, produces healthier vines and a much larger yield of Potatoes.

It pays to plant Maine Seed.

PROFITS IN POTATOES

Increased profits from Potatoes depend largely upon increased yield, better quality and lower production cost.

Acre costs are practically fixed. Machinery and labor saving devices reduce them. Proper spraying and cultivation improve yields and quality and prevent unnecessary losses.

In 1920, reports received from nineteen farmers in Michigan and Wisconsin, who harvested both fertilized and unfertilized Potatoes, showed an average gain of over 200 bushels for each ton of Fertilizer. Figure the profits for yourself. It pays to Fertilize liberally.

ADOPT THESE PRACTICES FOR PROFITS IN POTATOES:

1. Start with Maine grown, disease-free Seed.
2. Get more hills and consequently more Potato to the acre, by closer planting.
3. Use Fertilizer liberally.
4. Protect the crop from insect pests and plant diseases by proper spraying, so that the plant can make the best use of the plant food elements.
5. Use up-to-date machinery to reduce labor costs.

We speak from experience when we say it is a mistake:

- To cut Seed a long time before using;
- To allow the Fertilizer to touch the Seed pieces;
- To allow the Seed pieces to remain in the sun uncovered;
- To plant Seed grown in any section but the far north;
- To plant less than 4 bbls. per acre;
- To expect a good crop from small Seed pieces;
- To plant Potatoes without first thoroughly pulverizing the soil;
- To buy Seeds from any but *reliable* Seedsmen.

Spaulding Rose.—This is a Rose variety, pink skin, good table quality and an enormous yielder.

Irish Cobbler.—An excellent extra early variety, will mature in seven weeks from time of planting; in color pure white with deep eyes, usually of good cooking quality.

Use O. & W. Potato Fertilizer

The following is a copy of letter received by us:

COOPERATIVE EXTENSION WORK
AGRICULTURE AND HOME ECONOMICS

State of Connecticut.

Connecticut Agricultural College

EXTENSION SERVICE

U. S. Department of Agriculture Cooperating

Olds & Whipple,

Storrs, Conn., January 19, 1923.

166 State St., Hartford, Conn.

Gentlemen:

For the last nine years the Storrs Experiment Station of the Connecticut Agricultural College has been testing the yielding capacity of different strains of potatoes grown in different localities, and also certified against uncertified seed. The Extension Service of the College has also conducted a large number of demonstrations throughout the state to show the difference in yields of certified, uncertified and native seed potatoes with the result that the more progressive farmers in the state at the present time are using only certified seed. Each year there is a large increase in the number of farmers following this practice. The following is a summary of the results of these tests conducted by the Storrs Experiment Station showing the 1922 yields:

Thirty-four certified strains gave an average yield of 273 bushels per acre.

Twenty uncertified strains gave an average yield of 221 bushels per acre.

This shows a difference of 52 bushels per acre in favor of certified seed over uncertified seed.

The Storrs Station test comparing native seed stock with northern grown seed shows that native seed produced from northern grown seed purchased the previous year gives 25% less yield than new northern grown seed. Also, that the native seed produced from northern grown seed purchased two years previous gives 51% less yield than new seed stock.

This clearly demonstrates that the practice of many farmers to use their own home grown seed or seed grown in their immediate locality is decidedly unprofitable. If this practice is followed they may expect to get from 50 to 100 bushels per acre less than they would get by using northern grown certified seed.

The policy of the Extension Service of the Connecticut Agricultural College therefore is:

1. To recommend Certified Northern Grown Seed Potatoes if they can be obtained.

2. If certified seed stock cannot be obtained to recommend selected northern grown seed stock.

3. To discourage farmers in the use of home grown seed.

Realizing that you are distributors of seed it is our thought that this information will be of value to you in the purchase of your seed supplies and that you may cooperate with our Extension Service in selling the idea of better seed to farmers.

Should you be interested in getting more information with regard to the results secured here at Storrs, it will be a pleasure to supply you with the details of our experimental work.

(Signed)

Yours very truly,

H. J. BAKER, Director.

Potato Tests 1923

STORRS EXPERIMENT STATION RESULTS SHOW SUPERIORITY OF CERTIFIED SEED

By Henry Dorsey

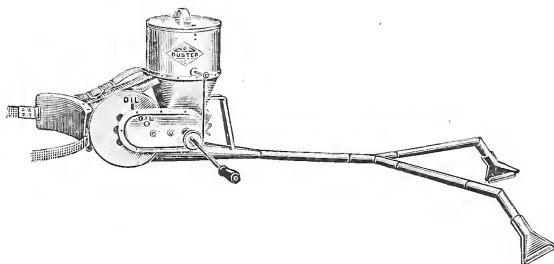

Experiments with potatoes during 1923 at Storrs tend strongly to confirm previous findings of the value of certified in comparison with uncertified seed stock. Fifty-seven different strains of Green Mountains have made an average yield of 252 bushels per acre, while five uncertified lots averaged 176.6 bushels, thus falling behind the certified stock by 75.4 bushels per acre.

The value of certification is further brought out by the table giving the comparative yields of certified and uncertified Green Mountain seed potatoes at Storrs for the past 4 years.

| Year | Bu. per acre for | | Bu. gain Certified Seed |
|---------|------------------|------------------|----------------------------|
| | Certified Seed | Uncertified Seed | |
| 1920 | 207 | 145 | 62 |
| 1921 | 314 | 258 | 56 |
| 1922 | 308 | 235 | 73 |
| 1923 | 252 | 176.6 | 75.4 |
| Average | 270.25 | 203.65 | 66.6 |

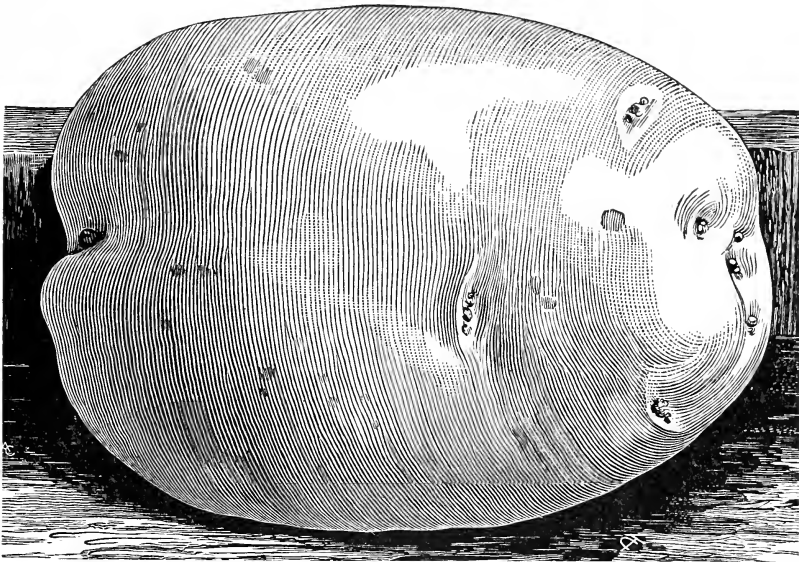

A further benefit derived from certified seed potatoes is that of quality. The past year the certified seed gave 23.8 percent more potatoes of U. S. Grade No. 1 than did uncertified seed. In each of the three previous years this increase had been but seven percent.

Findings to the present indicate the extreme value of certified seed stock for Green Mountain potatoes and show certified seed to be desirable with Irish Cobblers. The quality of potatoes from certified seed is better, so that benefit is derived both from greater yields and in a larger proportion of merchantable potatoes. Green Mountains far outyield Irish Cobblers and lead other varieties by an appreciable margin.

Insecticides and fungicides are now being used extensively in the form of Niagara Dust both on the Potato Crop and in the Orchards.

We carry in stock at all times a complete line of this material also machines for applying same. Dusting can be done much more rapidly than spraying and according to most authorities is equally efficient. For further information relative to dusting see page 58.

Carman 3.—A late Maine crop potato; this variety will produce almost all large potatoes and but few small ones, claimed by its introducers to outyield any other variety. Good keeping qualities.

Gold Coin.—Productive and of unsurpassed quality, very uniform in size. Skin a light golden tinge, usually having a russet appearance which indicates good table qualities; a vigorous grower not easily effected by blight.

Improved Green Mountain.—This variety is too well known to require any description; it is recognized as the standard of excellence in all New England; white skinned, oval formed, smooth and attractive and a good yielder.

To get the best results potatoes must be carefully sprayed. Use Bordeaux Mixture Powder, 8 pounds to 50 gallons of water. Apply 50 gallons of this solution per acre. First application when vines are from four to six inches high. Subsequent applications from 10 days to 2 weeks until 4 to 6 applications have been made. This treatment is to control blight and flea beetle. As soon as potato bugs put in their appearance add 4 to 6 lbs. of Arsenate of Lead Paste or 2 to 3 lbs. Arsenate of Lead Powder to each 50 gallons of diluted Bordeaux Mixture or 50 gallons of water if Bordeaux is not being applied. One application of Arsenate of Lead is usually sufficient to control Potato Bugs. However, during seasons when they are especially bad, two to three applications may be necessary to cover new growth of foliage.

It Pays to use our Potato Fertilizer

Legume Inoculation **HUMOGERM**

A Seed and Soil INOCULANT

**That Increases Crop Production and Greatly
Improves the Soil**

Roots like this mean bigger
yields—better soil.

Crop and soil experts agree that for best growth, and to put atmospheric nitrogen in the soil, it will pay all farmers to inoculate all legumes, even where they are at present successfully grown. The cost is trivial when compared with the profit it will bring you. Legumes are clovers, peas, and beans, alfalfa, soy beans, vetches, and other plants that grow their seeds in a pod. Their roots are the home of bacteria that draw fertility-building nitrogen from the air and store it in swellings on the roots, called nodules. These nodules not only feed nitrogen to the crop they are on, but rot away in the ground and supply valuable nitrogen to the soil for future bumper crops of corn, wheat, cotton, oats, fruits, etc.

**HUMOGERM is Economical
and Easy to Use**

Humogerm carries the nitrifying bacteria in a porous humus medium which acts as a natural home for them—keeps them fresh, active and vigorous. The ventilated cans are friction top and open easily without cutting.

Place seed in pile, moisten slightly with water and a little sugar, pour on HUMOGERM, and plant in usual way. This gives thorough inoculation, and is cheaper, safer and better than the discredited, laborious soil transfer method.

How to Order. Specify crop and number of bushels you wish to inoculate. The can unit designations are on the bushel basis; for instance, the 1 bu. size contains sufficient culture to thoroughly inoculate 1 bu. of legume seed, any variety.

Special garden size for peas, beans and sweet peas, 25 cts. You will be delighted with the fine results. Prices: $\frac{1}{4}$ bu., 35 cts., $\frac{1}{2}$ bu., 60 cts.; 1 bu., \$1.00; $2\frac{1}{2}$ bu., \$2.25.

When more than one bushel of seed is planted to the acre, the 1 bu. size contains sufficient inoculation for the amount of seed planted on one acre.

Agricultural Implements

Farm and Garden Tools

Owing to unsettled market conditions, all prices on implements and tools subject to change without notice.

The following pages are devoted to a description of farm implements which we sell. Our selection of these has been made in the same careful way as governs the selection of all the goods we offer to our customers.

Our object and desire being to sell only the best and such as will be most acceptable to our trade, both in point of service, convenience, and economy.

A partial list follows of some goods we do not illustrate. Read it over carefully as it may contain something you need. Samples of all may be seen at our showrooms, 164-8 State St., and prices will be made upon application. Write us also if what you need is not listed here, as we aim to make our store the headquarters for everything needed on the farm.

We will gladly make prices and send special reading matter on any of the above.

"PENNSYLVANIA" Hand and Horse Lawn Mowers

Sizes 15, 17, 19, and 21 inch.
High Wheel.

The "Pennsylvania" has been
recognized for many years as
the standard among Lawn
Mowers.

Cuts longer grass, requires less
repairs than any other mower
made. Used on the State Capitol
grounds and by all first class
gardeners everywhere.

GREAT AMERICAN Lawn Mower

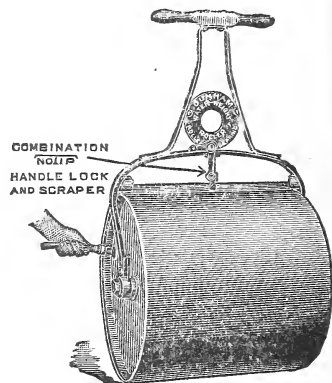

Sizes 15, 17, 19 and 21
inch., High Wheel.

This Mower is of the
same manufacture as the
"Pennsylvania," and is
a high grade machine
throughout. Has ball-
bearing equipment which
insures less friction and
wear. It has been sold
by us for eleven years
and given highest sat-
isfaction.

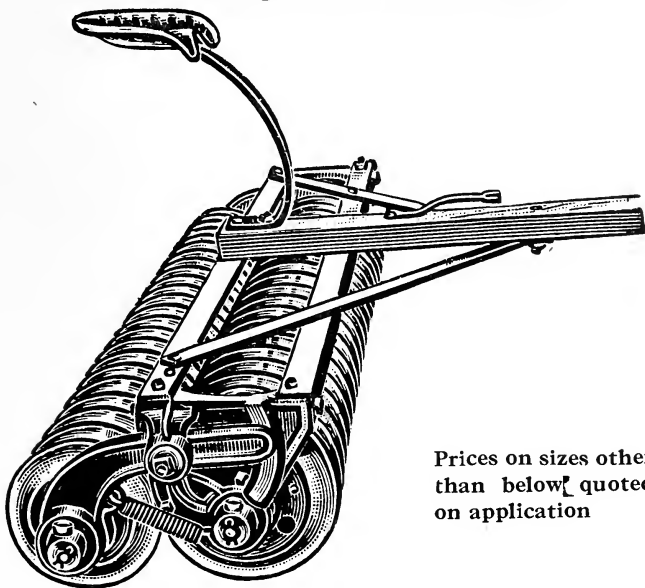

Water Weight Lawn Rollers

The water weight lawn roller has almost entirely super-
ceded the old fashioned cast iron roller. By regulating the
amount of water it can be made to weigh as desired. We
offer it in three sizes:

| No. | Diam- eter | Width of Drum | Weight Empty | Weight Full | Price |
|-----|---------------|------------------|-----------------|----------------|---------|
| 601 | 14" | 20" | 50 lbs. | 150 lbs. | \$15.00 |
| 602 | 18" | 24" | 75 " | 330 " | 18.50 |
| 603 | 24" | 24" | 100 " | 440 " | 22.00 |

The New Roller-Bearing, Light Draft, D-Type Brillion King Soil Pulverizer

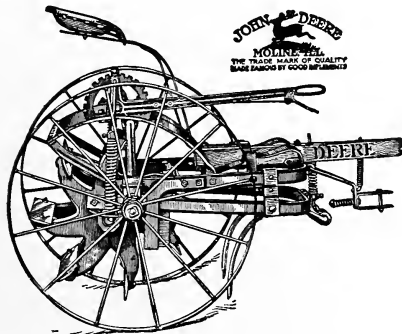

Prices on sizes other
than below quoted
on application

To make your soil yield the greatest possible return for your money, time and labor, you must first properly prepare the seed bed. A certain amount of moisture is absolutely necessary for dissolving the plant food particulars in the soil. Therefore, the soil must be so pulverized and packed as to retain the proper moisture for feeding the plant. Mere plowing and harrowing is not enough as there is too much air space left between the furrow slices. Heavy sod land should be well disced before the pulverizer is used. Most farmers who have tractors do both operations at once by hitching the pulverizer behind the harrow. Made in single and double gang and in many sizes.

D-60 Double Gang 6 feet long, 29 sections, front gang 15" in diameter,
rear gang 12" in diameter, Price \$80.00 Net Cash Price \$76.00

F-84 Single Gang 8 feet long, 21 sections, 15" in diameter,
Price \$70.00 Net Cash Price \$66.50

STALK CUTTERS

These machines are great labor savers. Any farmer raising a considerable acreage of corn, Primed or Shade tobacco should own one.

Seven knife John Deere Cutter, with
Neck Yoke and Evener,
Price \$66.50 Net Cash Price \$63.00

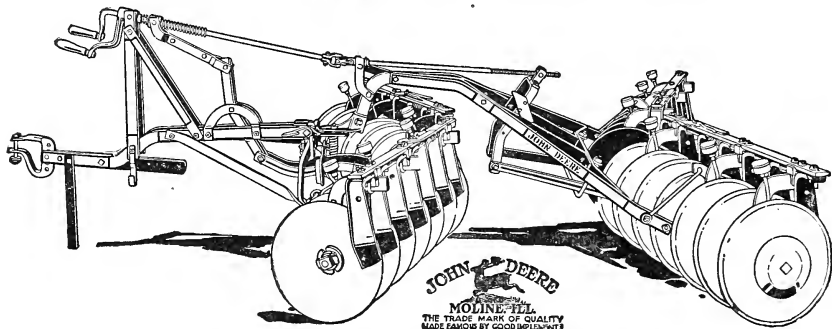

Above Machine less Neck Yoke and
Evener,
Price \$63.00 Net Cash Price \$59.85

LAND ROLLERS

8 Feet in Length Price \$50.00

Net Cash Price \$47.50

JOHN DEERE MODEL "L" TRACTOR DISC HARROW WITH YIELDING LOCK

For Use with Any Standard Tractor

Convenient Angling Cranks

Patented Aligning Device

A Flexible Tractor Disc Harrow

Adjustable Disc Scrapers

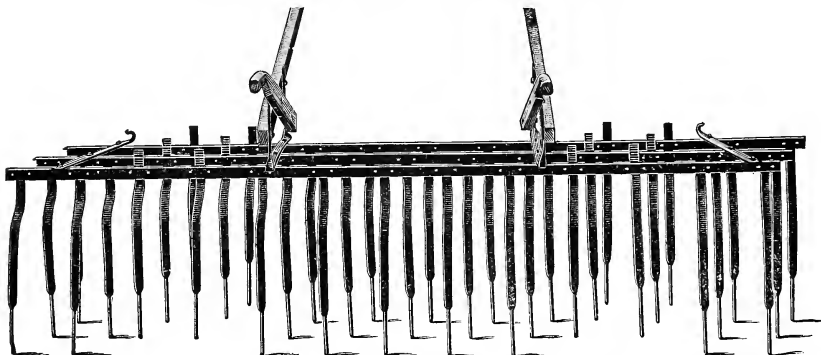

Convenient Grease Cups

Model L, 24-16" discs 6 ft. cut, Price \$125.00 Net Cash Price \$118.75

" L, 28-16" " 7 ft. " " 135.00 " " " 128.25

" L, 32-16" " 8 ft. " " 145.00 " " " 137.75

HALLOCK WEEDER

The teeth are round and each one can be raised to different heights. Does most thorough and perfect work. May be adjusted for either hard scratching or for light work. Suitable for all soil conditions.

Price \$16.00

Net Cash Price \$15.20

A standard weeder having curved teeth.

Superior Fertilizer Sower

Superior No. 16 Broadcast Fertilizer and Lime Sowers are admirably adapted to sowing Land Plaster, Lime, Dry Wood Ashes, etc., also all Standard Commercial Fertilizers in quantities over 300 pounds. These machines are very simple and durable, have great range of quantity and distribute the materials sown very evenly and uniformly. The hoppers have large carrying capacity and can be quickly and thoroughly cleaned whenever desired.

Screens can be furnished for the hopper at a small additional cost.

The width of the Two-Horse Sower is 8 feet, has a hopper capacity of 10 bushels, and a range of quantity from 300 lbs. to 6000 lbs. per acre.

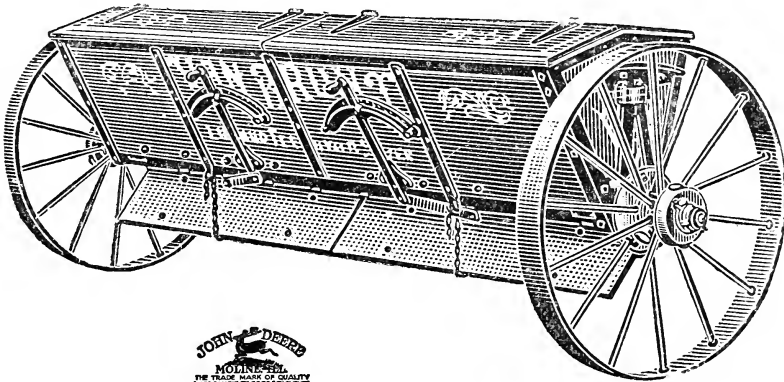

Price with Agitator \$90.00 Net Cash Price \$85.50

" less Agitator \$80.00 " " " 76.00

The One-Horse Sower is 5 feet wide and has hopper capacity of 6 bushels.

Price \$78.00 Net Cash Price \$74.00

Van Brunt Lime and Fertilizer Sower

Is built in the standard size to cover eight feet of ground, carrying capacity of ten bushels.

For strength, durability and simplicity it is unexcelled.

This sower has heavy wood wheels, removable dust proof boxings, and compression grease cups, with chilled wheel bearings.

The hopper is exceptionally strong, steel ends with angle steel corners, thoroughly braced, close fitting covers and removable screens.

Shifter levers on rear of hopper are provided with feed gauge lock, so that when set to sow a certain amount, the feeds may be closed entirely or quantity reduced when desired, and thrown back to the original position, avoiding the necessity of resetting the feed gauge.

Each ground wheel is a drive wheel, driving one-half of the machine. There are no gears or chains to break or get out of order.

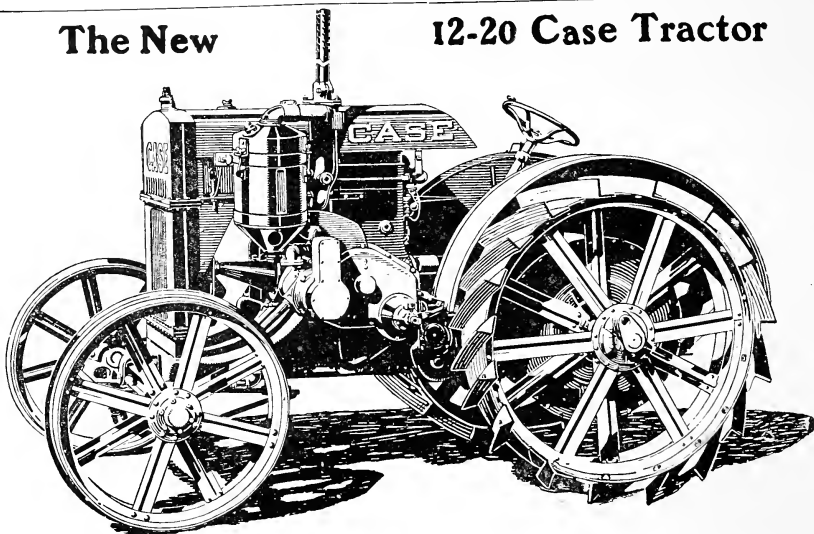

Price less Agitator \$85.00 Net Cash Price \$80.00

" with " 95.00 " " " 90.00

No. 21 McWhorter Wheelbarrow Sower

A very popular machine for sowing fertilizer between the rows.

Price \$23.00 Net Cash Price \$21.75

The New**12-20 Case Tractor**

Marks another advance in our program of supplying farmers with dependable power farming machinery of the highest possible efficiency.

In this tractor has been embodied every quality to make it the best and most highly practical small tractor on the market. It possesses every good feature found in other tractors and in addition, it has many distinctly new features and advantages that mark it as the highest achievement in farm tractor development.

100 PERCENT USEFULNESS

The Case 12-20 Tractor is an all around farm tractor, equally satisfactory for both belt and traction work.

The turning radius is 12 feet.—an advantage for general farm work.

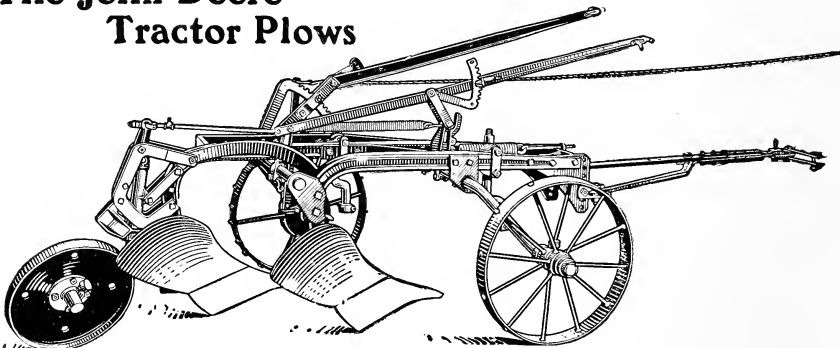

This tractor has the belt pulley mounted directly on the motor crankshaft, which eliminates gears, friction losses and complications, and places the pulley in a convenient position to line up with and receive the belt.

Two traction speeds are provided, one of 2.2 and the other 3 miles per hour, most practical speeds for farm and road work.

It is rated at 20 brake horsepower and has a reserve of at least 20% beyond this—ample reserve power is important in field work.

Price \$895.00 F. O. B., Racine, Wis.

The John Deere Tractor Plows

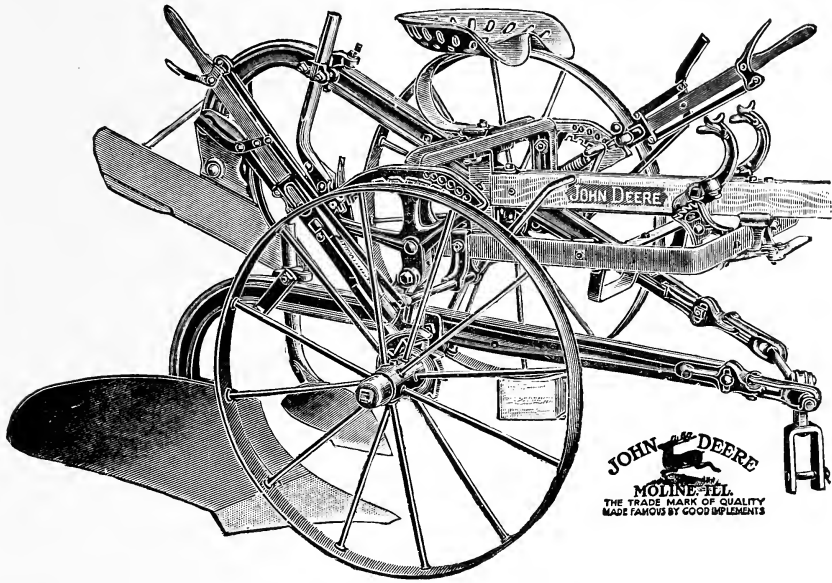

John Deere Tractor Plows are made to meet every Tractor Plowing requirement to best advantage. Into their construction goes the experience of more than 80 years of leadership in plow-making. There is special satisfaction to every user in the continued good service the John Deere Tractor Plows give.

No. 5 —1441S. 28 inch cut with combination Jointer and Rolling Coulters,
Price \$130.00 Net Cash Price \$123.50

No. 40—1441S. 28 inch cut with combination Jointer and Rolling Coulters,
Price \$105.00 Net Cash Price \$99.75

The No. 40 Plow is designed to follow the Fordson Tractor. It is superior in our opinion, to any other Plow designed for this Tractor, as it has a flexible hitch.

The John Deere Two Way Sulky Plow

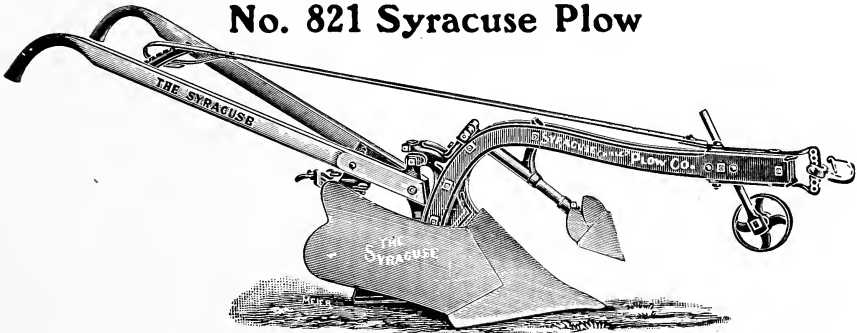

Combined in the John Deere two way plow are a number of strong, valuable and distinguishing features. Among these are the patent auto foot frame shift, all steel and malleable frame and steel arch, long malleable beam clamp, automatic shifting hitch and horse lift, unusually wide bearing base and adjustable jointers. For hillside or irregular fields, where it is desirable to throw earth all one way, there is no equal to the two way.

Made in two sizes:

A black and white illustration of a hand holding a rectangular can of Havoline Oil. The can is labeled "FIVE U.S. GALLONS NET.", "HAVOLINE", "OIL", "It makes a difference", "MEDIUM", "INDIAN REFINING CO.", and "NEW YORK CITY". The hand is shown from the side, holding the can by the top and bottom edges.

Your Car Deserves It

To do its full duty your motor needs the protection of the best oil. Neither heat nor wear will break up the protecting film of Havoline Oil. It makes a real difference in the smooth-running efficiency and long life of your motor. Havoline gives more miles to the gallon. We have the proper grade of Havoline for your make of car, truck, or tractor.

Prices on Barrels, 5 Gallon and 1 Gallon Cans on Application.

CLARK'S CUTAWAY HARROWS

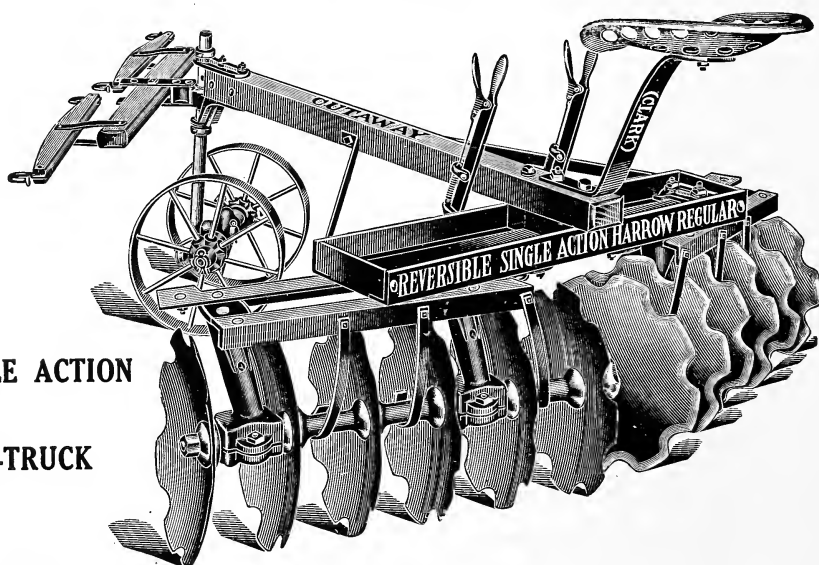

Single Action with
Steel Head

This is a standard harrow, thoroughly well made, equipped with the justly celebrated Clark hard-wood journals. These journals outwear metal, give less friction and are cheaper to replace. Furnished with either solid or cut out discs.

A4—One horse, 8-16" discs Price \$42.30 Net Cash Price \$40.25

A6—Regular 12-16" discs, complete with neck yoke and eveners, Price \$52.00
Net Cash Price \$49.50

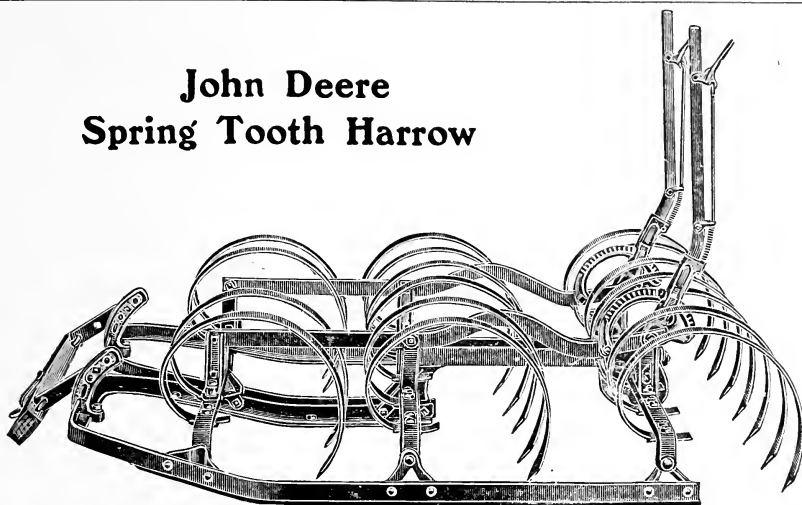

SINGLE ACTION
WITH
FORE-TRUCK

The above cut shows the Clark Cutaway Harrow equipped with tongue truck or fore carriage. This truck is all steel, durable and strong yet light; it has first, the adjustable hitch to meet the height of any team, second, adjustable tongue attachment to suit the height of any harrow; third, axle joint so that either wheel may run over clods, stones and other obstructions without affecting the even, regular draft of the harrow.

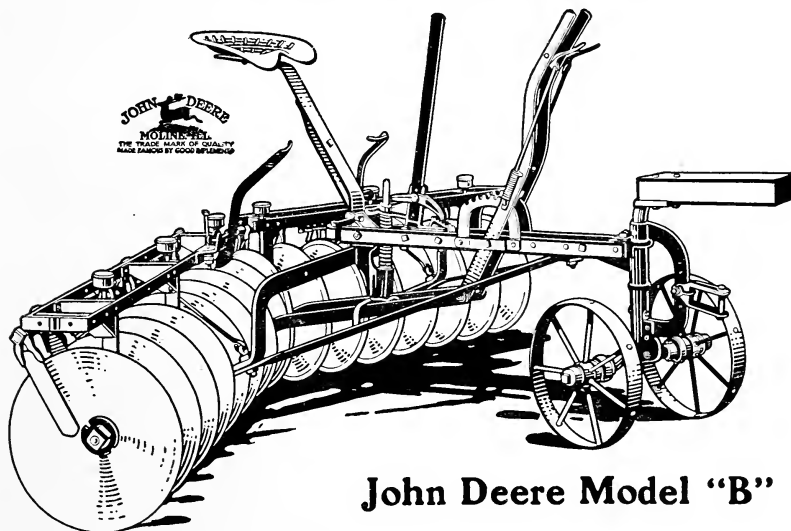

A6—Regular 12-16 inch discs, Price \$60.40 Net Cash Price \$57.50
Fore-truck as an extra, Price \$10.00 " " " 9.50

John Deere Spring Tooth Harrow

This is not a cheap tool, either in construction or price. It is for the man who wants the best and most satisfactory. The frames are of heavy channel steel, two inches wide. As the frames are carried high above the ground, they will last a lifetime.

Price for 17 Teeth \$35.00 Net Cash Price \$33.25

John Deere Model "B"

The John Deere Model "B" is a superior machine because of its flexibility—an important principle of construction that places it in a class by itself.

A third lever with an unusually powerful spring and a pivoted yoke enables the driver to give light or heavy pressure at inner ends of the gangs so as either to cut out dead furrows or to cultivate over ridges or back furrows without burying the harrow in the center.

Each gang of the Model "B" works independently—only the part passing over an obstruction is raised out of the ground. With a rigid harrow, the entire machine is lifted out and considerable ground left unworked. In other words, the Model "B" can readily be regulated to penetrate at even depth its entire width, and the pressure spring holds the gangs to the uneven surface of the ground at all times.

Double-angling levers give perfect control of the entire machine. When working on hillsides, this harrow does not crowd towards the bottom, as the lower gang can be given a greater relative angle.

The Model "B" Has Extra Strength Without Unusual Weight

| | | |
|--|---------------|------------------------|

ACME

Pulverizing Harrows

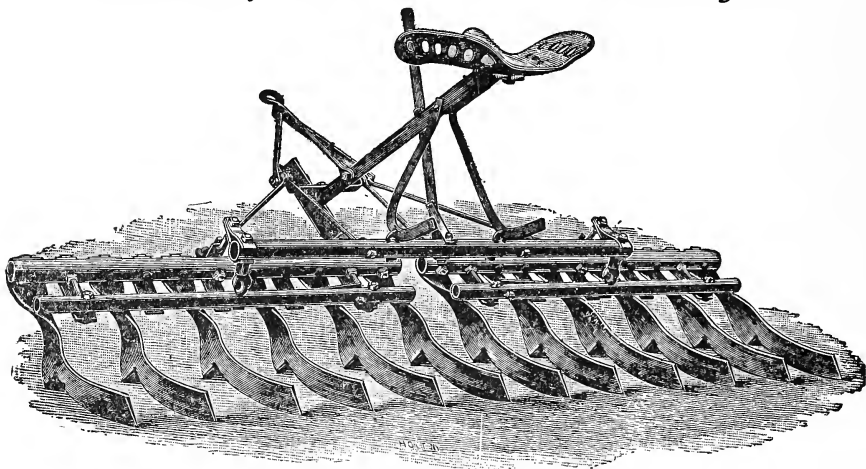

Warranty. I hereby warrant each and every part of each and every "Acme" Pulverizing Harrow against breakage for the term of one season after it leaves the manufactory or any of my storehouses, and I hereby authorize Agents and Dealers to FURNISH FREE NEW PARTS TO REPLACE BROKEN PARTS; the only stipulation being, that the farmer demanding such parts shall sign a statement that the breakage occurred in fair usage, which statement shall be countersigned by the Agent or Dealer from whom the Harrow was purchased.

DUANE H. NASH, Manufacturer.

No. 23.

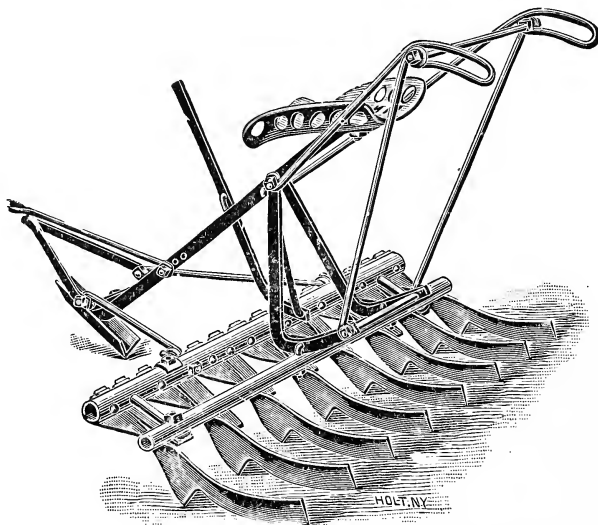

*Two-Horse Size.
Works 6½ ft. Wide.*

*Riding Harrow.
Flexible Style.*

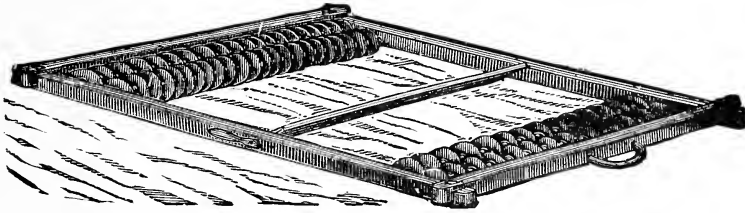

The gang bars may be made rigid, when desired by means of braces provided for that purpose.

Price of H. (one-horse size) \$20.00 Net Cash Price \$19.00

The Meeker Smoothing Harrow

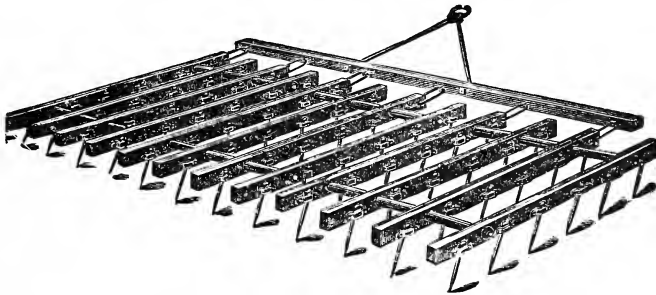

A perfect harrow and land roller combined. This harrow has become a great favorite among all classes of farmers and market gardeners.

It has four (4) sets of rollers containing 58 steel discs. These discs grind all lumps and save the work of raking and also mash small stones below the surface better than any field roller, leaving the land smooth and level.

Meeker with 10 inch discs Price \$40.00 Net Cash Price \$38.00

Clipper Smoothing Harrow

The teeth are $\frac{9}{16}$ in. round, and are attached to bars by malleable clasp, and are so arranged that by hitching to one end of harrow the teeth pull slanting as shown in cut, by hitching to other end the teeth pull straight. Wood frame.

\$42.75

Corn, Bean and Pea Planter and Fertilizer Distributor

THE JOHN DEERE CORN PLANTER

Every machine is warranted to be well made of good material, and guaranteed to do its work perfectly and satisfactorily with the different kinds of seeds, as we claim, if used according to directions.

No. 999

Here is a point we want you to think over: If a planter misses only fifteen kernels in every 100 hills, there is a loss of five bushels per acre in the yield.

The accurate planter prevents that loss—it proves to be one of your best friends because it does faithful work in producing bigger yields.

We want to show you the John Deere No. 999 Corn Planter.

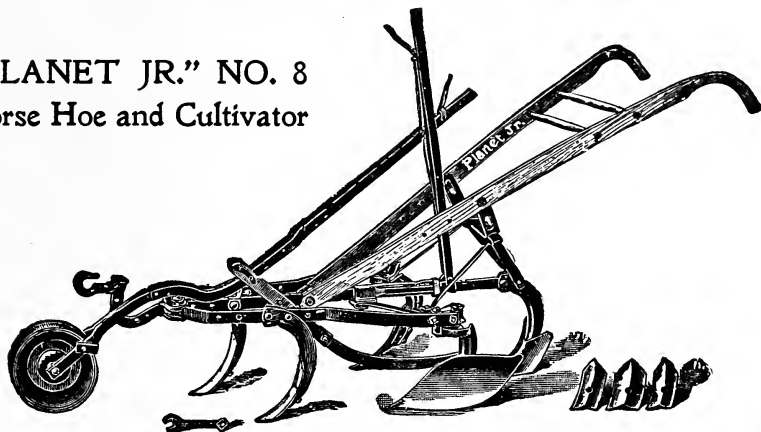

You can plant two, three or four kernels without changing seed plates or stopping the team. You can change from hilling to drilling instantly. You get nine different drilling distances without changing the plates.

Spraying Potatoes in Aroostook Co., Maine. Actual Photo.

The Hoover No. 400 Visible Potato Planter Is an Automatic, One Man Planter

This planter was designed to meet the general demand for a strictly high-grade, up-to-date potato planter, one that would be just as satisfactory for planting potatoes as the "Hoover" Potato Digger, has proved for digging them.

The fertilizer attachment is designed to meet the varied requirements of potato growers, as it will put the fertilizer either below or above the seed, as the operator desires.

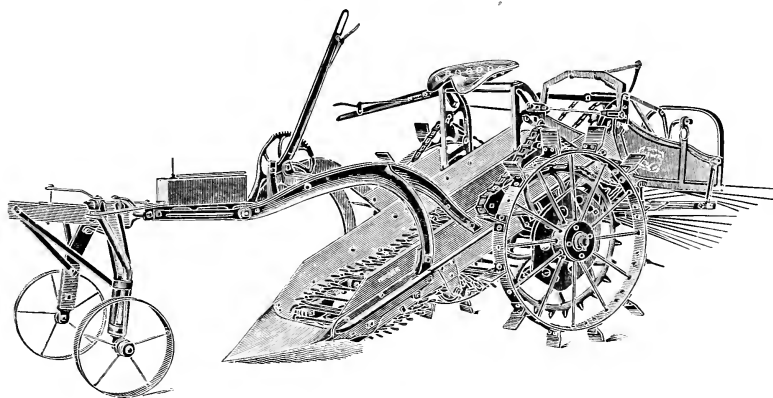

Price Complete, with Fertilizer Attachment, \$155.00

Net Cash Price \$147.25

Harvest time in Aroostook Co., Maine, Potato Fields. Actual Photo.

THE HOOVER POTATO DIGGER

This Potato Digger has become the standard of excellence everywhere. It is now used more largely in the potato growing section of Maine than any other make.

It separates the potatoes from the vines and weeds leaving them in a clean narrow row. Two horses will handle the machine under ordinary conditions. It is a great labor saver.

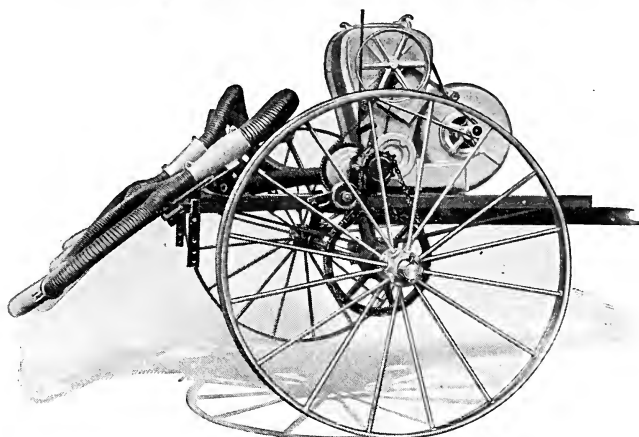

No. 330, Price \$160.00 Net Cash Price \$152.00

Niagara Dusting Material

The Bemis Transplanter

For Setting Tobacco and Other Plants

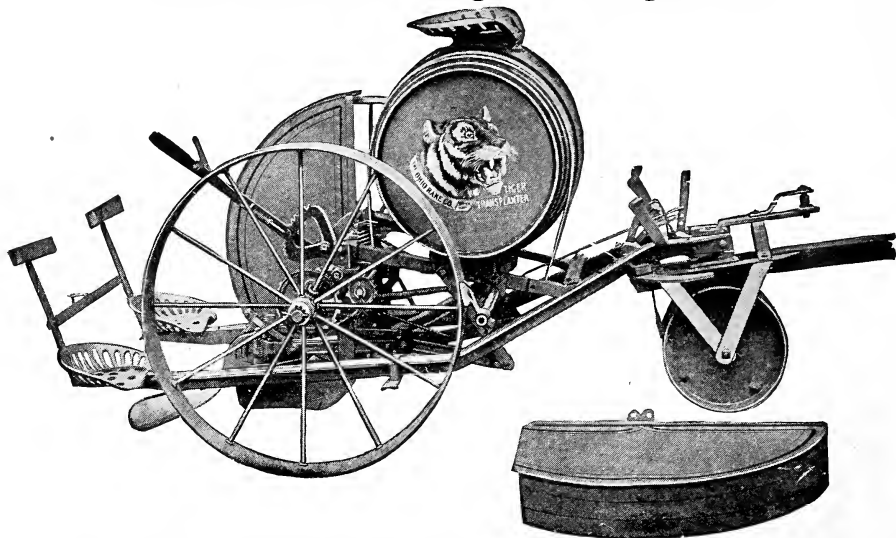

The above is the well known Bemis Transplanter made by Madison Plow Co. of Madison, Wis. with all improvements to date.

This machine is too well known to need any endorsement from us. Nearly every tobacco farm in the Connecticut Valley is equipped with one of these implements.

Price \$110.00 Net Cash Price \$104.50 Equipped with Double Truck \$2.00 Extra

The New 1924 Tiger Transplanter

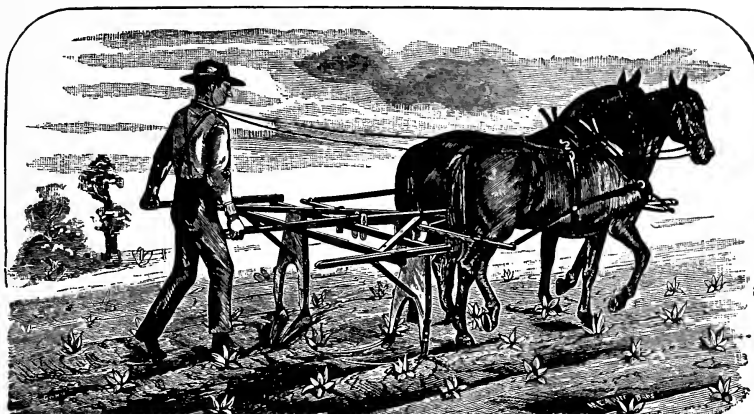

This machine is rapidly coming into popular favor. It is simply and strongly made. Has floating shoe, $1\frac{1}{4}$ in. water connections which insures ample water supply, positive acting valve. Examine this machine and you will be impressed with the superior quality of both material and workmanship.

See it on our sample floor.

Price \$100.00 Net Cash Price \$95.00

Use O. & W.'s Special Tobacco Fertilizer.

Prout's Hoeing Machine

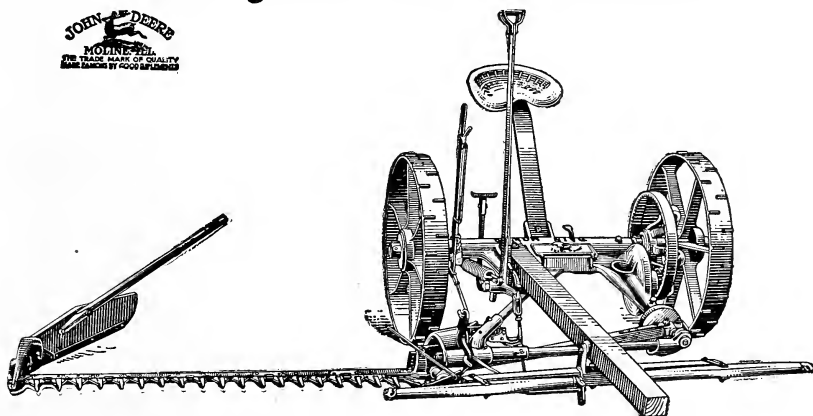

Unlike the Cultivators and Horse Hoes now in common use the whole surface or distance of 2 ft. more or less, on each side of plant is cut over with this machine, all the weeds are removed. The hoe steels being made tapering permit of cutting close up to plant without injury to the roots.

Price, plain \$31.00
Net Cash Price \$29.50

Price, with wheels \$34.50
Net Cash Price \$32.75

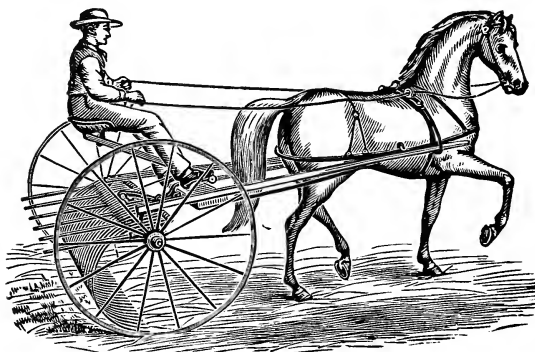

The John Deere Mower

This mower is noted for its strength, durability, light draft, ease of management and superior cutting power. Frame is one piece of iron—all parts are held securely. Compensating gears remove strain from bearings and transmit instead of consume power. All levers are easy to operate, and a boy can readily handle them. The knives can be closely and accurately adjusted to center in their guards, doing away with knife breakage and making easy cutting.

Champion Vegetable Cutter

This is one of the best machines in the market for cutting all kinds of vegetables. It is made with a wrought shaft with sections of knives fastened to it, and arranged so that a rotation of knives is continually passing a bed knife with cross knives passing between the section of knives; cutting always near the center shaft, making it cut easy and fine enough for cattle or sheep; also making a very regular cut.

This machine will cut sixty bushels an hour.

We sell Dr. Hess Poultry and Stock Remedies

Dr. Hess Poultry Pan-a-ce-a

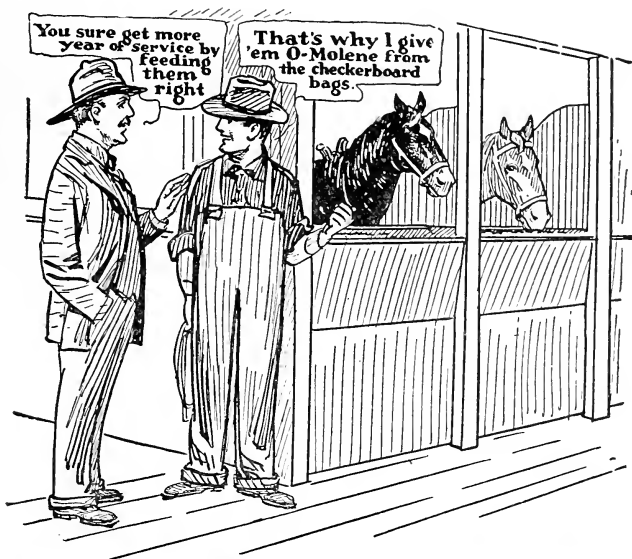

makes poultry healthy; makes hens lay; not a stimulant, but a tonic, that tones up the dormant egg organs, brings back the scratch and cackle, and compels each hen to put her share of eggs in the market basket.

It also contains internal antiseptics that counteract disease; insures a healthy, singing poultry

flock. Cost but a trifle—a penny's worth enough for 30 hens per day. 1½ lbs. 25cts., 5 lbs. 75 cts., 12 lbs. \$1.50, 25-lb. pail \$3.00.

Sold and Guaranteed by Us.

Why O-Molene Is Best

Thousands of horses lose their working ability and pep after 7 or 8 years of service. While others do hard work for 15 or 20 years. It's not because some have not been fed plenty of feed. A monotonous diet of corn, oats and hay doesn't give them a healthful variety.

What Goes Into O-Molene

To make O-Molene the perfectly balanced feed for horses and mules it goes thru a special process of manufacture. The grains are crushed and made more appetizing to the animal as well as more easily digested.

Only choice ingredients are used. Horses must have a feed that contains variety. O-Molene supplies a perfectly balanced ration.

What Is Taken Out

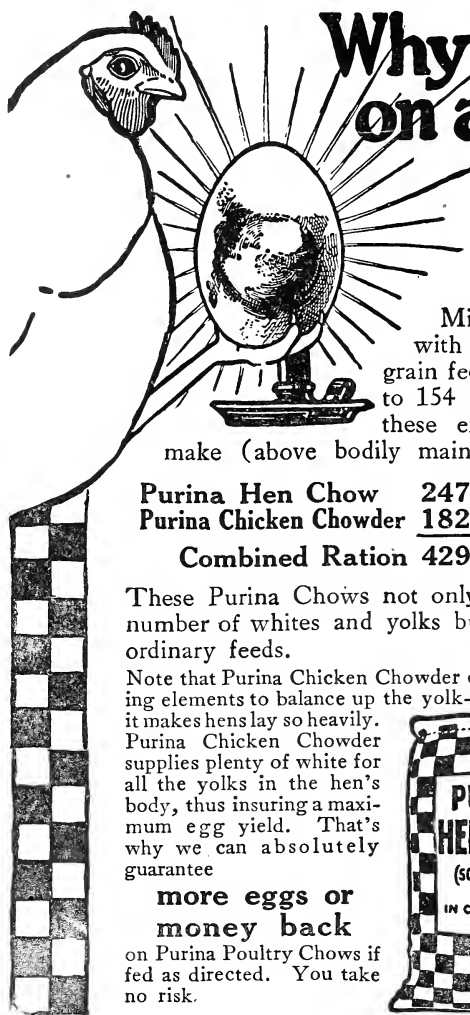

First only the highest grade grains are used. These are dusted and thoroughly cleaned, taking out all the chaff, dust, clipped ends and other undesirable parts. Then the grain is dried in a large kiln so that much of the moisture you pay for in ordinary grain is removed.

The result is, it takes much less O-Molene than ordinary feeds to keep a horse in perfect condition, and make him live and work longer.

Try a few bags and you'll agree that O-Molene costs less in the long run.

Send for Free Purina Horse Book it will save many Doctor's bills.

Why hens go on a strike!

When hens do not receive both the *white* and *yolk*-forming elements in their feed, they *cannot* lay.

Missouri Experiment Station tests with 100 lbs. of an average mixed grain feed produced about 224 yolks to 154 whites. Based on data from these experiments, Purina formulas make (above bodily maintenance), as follows:

| | | |
|------------------------|--------------|---------------|
| Purina Hen Chow | 247.49 yolks | 142.11 whites |
| Purina Chicken Chowder | 182.05 yolks | 282.55 whites |
| Combined Ration | 429.54 yolks | 424.66 whites |

These Purina Chows not only make a practically *equal* number of whites and yolks but make *more* of both than ordinary feeds.

Note that Purina Chicken Chowder contains the necessary white-forming elements to balance up the yolk-making grain ration. That's why it makes hens lay so heavily. Purina Chicken Chowder supplies plenty of white for all the yolks in the hen's body, thus insuring a maximum egg yield. That's why we can absolutely guarantee

more eggs or money back

on Purina Poultry Chows if fed as directed. You take no risk.

CARE OF CHICKS

A good start is the most important point in successfully raising baby chicks. Without the proper start little chicks can never develop into high producing pullets or vigorous cockerels. Every year millions of little chicks die during the first four weeks for lack of proper attention and care. Unless the tiny little ball of fluff is healthy and vigorous, it falls an easy victim to one of the many chick diseases.

One cent will pay the difference between feeding a little chick for the first six weeks on the cheapest and the best. And yet it is estimated that between 50 and 60 percent of the little chicks fed the cheap way are never raised to a profitable maturity. Thousands of poultry raisers all over the country who start their chicks right by feeding them Purina Chicken Chowder and Purina Baby Chick Chow are raising from 90 to 95 percent of their chicks.

We also have in stock a special feed for pigeons called Pigeon Chow

Here Is The Point!

¶ Paint cost depends not upon what you pay per gallon for the paint, but upon how much service you get out of every gallon of paint you buy.

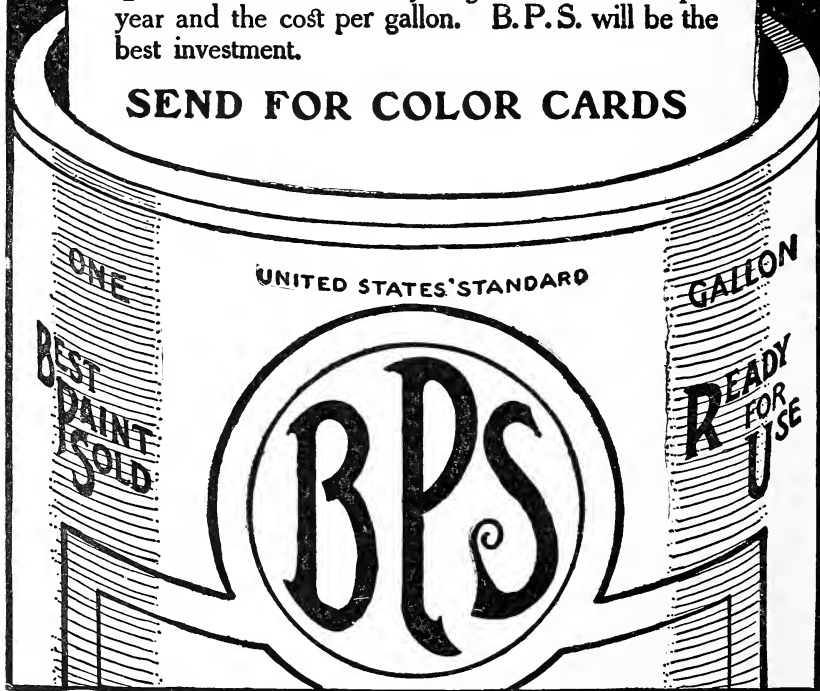

¶ Because there is quality in B. P. S. Paint, it gives service and satisfaction.

B. P. S. Paint covers from 350 to 400 sq. feet, two coats; a cheap paint will cover not to exceed 250 sq. feet.

¶ B. P. S. wears for years and leaves a surface fit to repaint, and the colors are permanent as it is possible to make them.

¶ Think it over seriously; figure out the cost per year and the cost per gallon. B. P. S. will be the best investment.

SEND FOR COLOR CARDS

You wouldn't let your wife carry a fifty-pound suitcase

That fifty-pound scuttle of coal—how long is your wife going to carry it?

It isn't that you wish her to carry it, but it probably never occurred to you that you can save her the strain of this load.

You know yourself what it means to lug a heavy load, especially on a hot summer day.

Give her a Florence Oil Range. It will make her kitchen cooler. It will preserve her health and youth. She will have no coal to lug or ashes to handle. And you can soon pay for the cost of a Florence out of the difference in cost between kerosene and coal.

Bring your wife in and have us demonstrate and explain to both of you the good-looking, quick-cooking Florence.

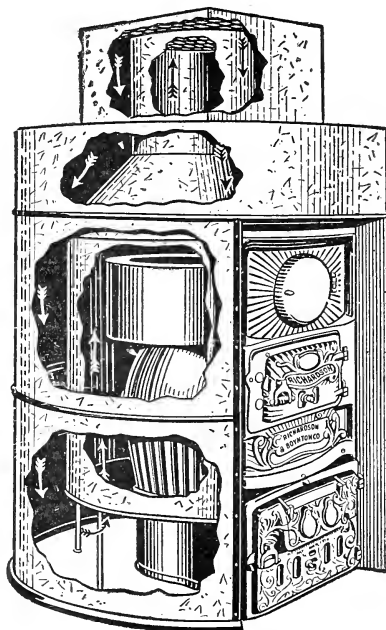

FLORENCE

OIL RANGE

Send for Catalog and Prices.

Heat at Low Cost

Note the
great amount of
space for
air circulation

It is the
Liberality of air
space that makes
the
Richardson
the greatest pipe-
less furnace
made.

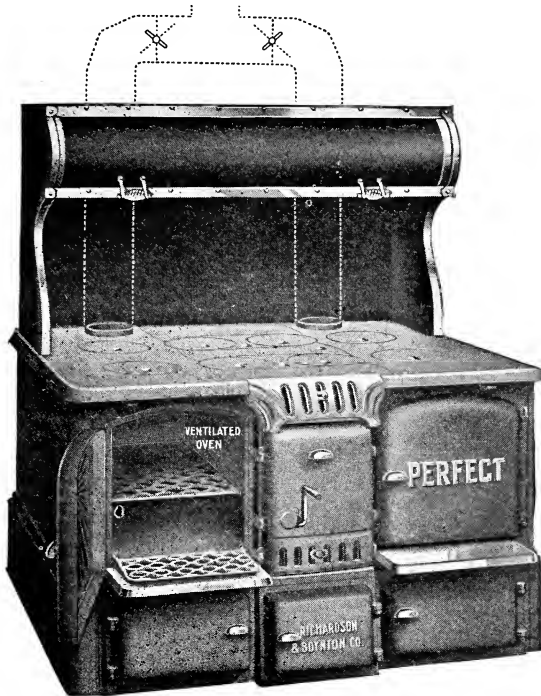

The pipeless furnace is the lowest-priced heating system that you can possibly purchase, and the Richardson is the most economically operated of them all. *It warms more air and burns less coal*, chiefly because of its over-size air chambers. You may burn hard coal, soft coal, wood, or any other fuel.

The study of air circulation and heat movement is a science all in itself, and Richardson engineers have mastered it, and have designed a pipeless furnace which is scientific.

The outer chamber is always comparatively cold. With the Richardson, you do not spend money for coal to *warm the cellar*. The heat goes up, not out. A warm cellar means a cold upstairs. You can store your vegetables in the cellar if you install the Richardson Pipeless Furnace.

It takes but little more time to install a Richardson Pipeless Furnace than it does to set up a stove. This economy of installation is more vividly realized when you reflect that it sometimes takes weeks of work, costly and inconvenient, to install other complete heating systems. The Richardson will go into any cellar; only 6½ feet head-room is necessary; only one hole in the floor is required. You save money when you buy it; you save money when you install it, and you save money every day you operate it. Send for catalog and price.

Richardson "Perfect" Double-Oven Ranges

THE PERFECT DOUBLE OVEN COOKING RANGES are made of the best quality iron and are heavy, durable and easy to keep in order. Two wrought iron ventilated removable ovens insure the finest results possible for roasting or baking. Large fire boxes fitted with triangular grates make it easy to shake and clean the bottom of the fire with practically no effort. Powerful water backs insure plenty of hot water. Made in three sizes.

BARSTOW

ELEVATED—COMBINATION RANGE.

Separate Coal, Gas and Broiling Ovens

An ideal piece of Cooking apparatus. Large enough for any home, yet built so compactly it occupies only 43½". Combines all the best features of a modern coal and gas range with several BARSTOW patented, unusual features.

Kitchen comfort is provided all the year. Warmth when required from fuel burned in the fire box. A cool kitchen in summer by using the gas section of the main top and the elevated gas ovens.

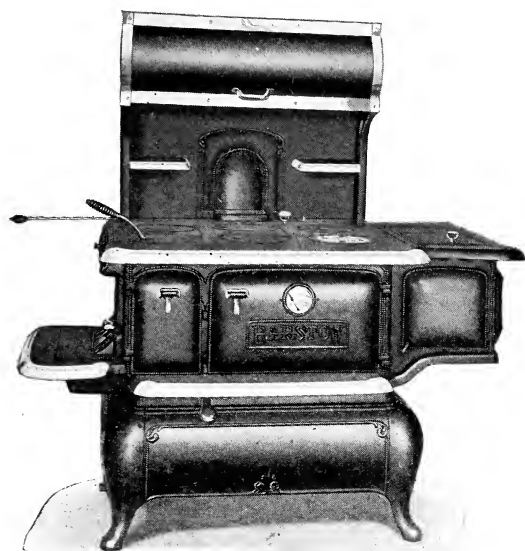

Glistening grey porcelain enameled castings with white porcelain panels and bright nicked trimmings combined in this Range give the whole kitchen a neat, sanitary appearance.

Top of range has four covers for coal, two 8" and two 6". For gas, four burners and a simmering burner, lighted by an automatic lighter having a shut-off cock.

Price completely installed Black Cast Iron \$165.00
 Grey Enamel 225.00

Barstow Richmond Ranges

For Every Kitchen Requirement—There IS Nothing Better

For
Nearly 50 Years
We Have Sold

THE RICHMOND RANGE

The
RANGE
that is guaranteed
to BAKE

Richmond Ranges are backed by the guarantee of three generations of stove manufacturers whose sole aim has been to produce goods of the highest quality.

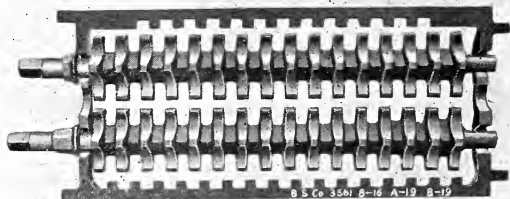

All Richmond Ranges can be equipped with either a plain flat grate, a triangular or a dockash grate; also a grate especially designed for burning pea coal. The Richmond line is the only line that can be furnished with a special pea coal grate. Pea coal is generally cheaper than other kinds of coal.

Send for booklet and prices.

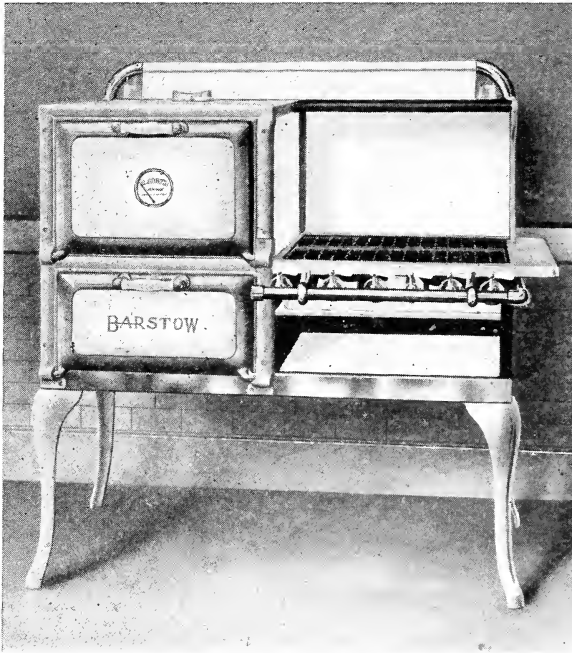

This grate is the Multiple pattern BARS-TOW patented, gearless, non-warping. Bars are interchangeable, easily operated; do not bind when shaking the fire. Will burn pea coal.

Grate and frame are removable through the fire door without disturbing any of the other fire box parts.

These ranges can also be furnished with special wood fixtures.

Barstow Gas Range

A beautifully finished gas range. Fully enameled, castings a soft tone French grey, sheet iron parts snow white with borders—latest style.

Also furnished in black with white panels. Right or left ovens. Baking and broiling ovens 18 x 18"—Rust proof.

"There IS nothing Better"

\$89.00 Grey
65.00 Black

SHEET METAL DEPARTMENT

We specialize in all kinds of tin and sheet iron work to order. Estimates given on all kinds of tin roofing, gutter and conductor work.

We make tobacco seed bed sterilizing pans in any size desired. These pans are made of extra heavy galvanized iron, reinforced with angle iron on top and sides and fitted with pipe connections to connect with boiler. These pans are placed over the seed beds and live steam turned into them which will destroy all germ life. They have proven very beneficial and insure growth of good sturdy plants. Prices on application.

We make ventilators of galvanized iron for roofs of tobacco sheds in any size required. Strong and well made.

O. & W. Asphalt and Slate Surface Roofing

A Ready-To-Lay Roofing for Tobacco Sheds, Barns and Garages. Made of long wool felt saturated with asphalt. Slate or plain surface. Fire resisting and water proof. 108 square feet to the roll. Easy to lay and cheaper than shingles. Nails and cement with each roll.

USEFUL CHEMICAL MEMORANDA

(Partly from the first annual report of the Connecticut Agricultural Experiment Station, 1876.)

Animal and vegetable substances, such as flesh, bone, wood, grain, manure, and the like, contain three classes of materials: Water, Organic Matters and Mineral Matter or Ash. If we heat a piece of wood, a whisp of hay, a bone, or a portion of manure or soil, in an oven, the water will be dried out. If we put the dried material in the fire, the *Organic Matter*, which consists mostly of the chemical elements, carbon, oxygen, hydrogen, and nitrogen will be burned away, and there will remain the *Mineral Matter* or *Ash*. The ash of these different materials generally contains more or less potash, soda, lime, magnesia, iron, alumina, silica, phosphoric acid, sulphuric acid, chlorine, or other ingredients. The proportions of these vary widely in different substances, from the large quantities to the merest traces.

Moisture.—All fertilizers contain more or less water, which, of course has no commercial value, and serves to make them heavier and relatively poorer in valuable ingredients. In the analysis that which is removed by heating to 212° Fahrenheit (or in some cases to a somewhat higher temperature), is designated as moisture. By subjecting the dried material to a higher temperature, the organic and volatile matters are driven off, and the ash remains. By treating this ash with strong acids, all that is of any value is dissolved.

Sand and Insoluble Matters.—The residue, which resists the action of both fire and strong acids, consists of silica and other mineral matters. These possess no fertilizing value, and are classified as sand, etc.

Nitrogen, Ammonia.—In our ordinary fertilizers, much or all of the nitrogen exists in unavailable forms. By more or less rapid alterations, by decay or otherwise which take place in the soil, these are changed to other compounds, which the plant can readily use as food. Of these latter nitric acid, which contains nitrogen combined with oxygen, is one; ammonia which consists of nitrogen and hydrogen and is represented by the chemical formula NH_3 is another. 14 parts by weight of nitrogen unite with 3 parts of hydrogen to form 17 parts of ammonia. Accordingly 14 parts of nitrogen are said to be equivalent to 17 of ammonia, or what is the same thing 100 parts of nitrogen are reckoned as equivalent to 121 parts of ammonia. In pure sulphate of ammonia, all the nitrogen is in the form of ammonia. In Peruvian guano, some of the nitrogen exists as ammonia also. In our ordinary fertilizers there is little or no ammonia. The very common practice of reckoning nitrogen as ammonia in fertilizers which do not contain it in this form is incorrect, misleading and therefore wrong, and ought to be abolished. Ammonia combined with sulphuric acid, forms sulphate of ammonia; nitric acid combined with soda, forms nitrate of soda.

Phosphoric Acid: SOLUBLE, REVERTED AND INSOLUBLE.—By phosphoric acid is understood the compound of phosphorous and oxygen, which is represented by the chemical formula, P_2O_5 . This combined with lime, forms phosphate of lime. The phosphate of lime which occurs in bone, and in South Carolina and other fossil and mineral phosphates, contains three parts of lime to one of phosphoric acid. This is often called bone phosphate, and is insoluble in water. When the bone phosphate is treated with sulphuric acid, the latter takes part of the lime to itself, forming sulphate of lime, and leaves the phosphoric acid in the form of a *Superphosphate*. This last is soluble in water, and when used as a fertilizer can be taken up by the plant at once, while the bone phosphate is slowly available as plant food. Phosphoric acid which has been rendered soluble, often enters into other forms of combination with lime, alumina, etc., which, though insoluble in water, are soluble in citrate of ammonia. The terms, reverted, reduced and precipitated, are applied to it when in this form.

The reverted phosphoric acid ranks in solubility, and consequently in value, between the soluble and insoluble. The soluble and reverted are sometimes classed together as *Available* phosphoric acid.

In some analyses the percentage of phosphoric acid is not stated separately, that of "bone phosphate of lime" being given in its stead. Sometimes the expression "soluble bone phosphate of lime" is met with, which is certainly a misnomer. 142 parts by weight of phosphoric acid P_2O_5 unite with about 168 parts of lime CaO to form 310 parts of bone phosphate $Ca_3(PO_4)_2$; 100 parts or pounds of phosphoric acid are said, therefore, to be equivalent to 218 parts of bone phosphate. Special stress is laid on this point, because those not familiar with chemistry are apt to be deceived in comparing analyses, in some of which the term phosphoric acid, and in others the term bone phosphate, is used. It would be more accurate and clear, and in every way better to discard the term bone phosphate of lime in analyses of fertilizers, and speak only of phosphoric acid.

Potash, or potassa, is the compound of the metal potassium with oxygen, which is represented by the chemical formula K_2O or KO . This combined with sulphuric acid forms sulphate of potash. Potassium and chlorine together form chloride of potassium, or "muriate of potash," as it is called by dealers.

100 pounds of pure sulphate of potash contains about 54 pounds of "actual potash." 100 pounds of sulphate of potash are therefore said to be equivalent to 54 pounds of actual potash, and vice versa, 54 pounds of potash, in the sulphates are reckoned as equivalent to 100 pounds of sulphate of potash. In the "muriates" 100 pounds of chloride of potassium are reckoned equivalent to about 63 pounds of potash, and vice versa.

Carbonate of Potash, K_2CO_3 — This fertilizer chemical is the ingredient which gives to wood ashes and cotton hull ashes their value as tobacco fertilizers, and it is practically free from magnesia. It was formerly prepared by extraction from wood ashes, and formed the "pearl ash" of commerce. It has been used with good effect as a tobacco fertilizer in the Poquonock experiments.

The following figures will be found useful in calculations of the composition of fertilizers.

NITROGEN COMPOUNDS

| 14. | parts of Nitrogen | are contained in | 17. | parts of Ammonia. |
|-------|-------------------------------|------------------|--------|----------------------|
| 100. | " | " | 121.43 | " |

SEED AND PLANT TABLES.

| | Quantity per Acre | Weight Per Bu. |
|---|--|----------------------|
| Barley | 95 to 120 lbs. | 48 lbs. |
| Blue Grass (Canada) | 25 to 40 lbs. | 14 lbs. |
| (Kentucky) | 25 to 40 lbs. | 14 lbs. |
| Buckwheat | 50 to 60 lbs. | 48 lbs. |
| Clover-Alfalfa (Broadcast) | 20 to 30 lbs. | 60 lbs. |
| (Drills) | 15 to 20 lbs. | 60 lbs. |
| Crimson | 10 to 20 lbs. | 60 lbs. |
| Red | 10 to 15 lbs. | 60 lbs. |
| White. | 5 to 10 lbs. | 60 lbs. |
| Corn (Hills) | 15 to 20 lbs. | 56 lbs. |
| (drills for fodder) | 60 to 75 lbs. | 56 lbs. |
| (broadcast) | 120 to 150 lbs. | 56 lbs. |
| Cow Peas in Drills. | 60 to 90 lbs. | 60 lbs. |
| Millet (Common) | 25 to 40 lbs. | 48 lbs. |
| (Hungarian) | 25 to 40 lbs. | 48 lbs. |
| (Japanese) | 12 to 20 lbs. | 32 lbs. |
| Oats | 60 to 90 lbs. | 32 lbs. |
| Orchard Grass | 25 to 40 lbs. | 14 lbs. |
| Rape (broadcast) | 5 to 6 lbs. | 60 lbs. |
| (drills) | 3 to 4 lbs. | 60 lbs. |
| Red Top (unhulled) | 25 to 40 lbs. | 14 lbs. |
| (recleaned) | 10 to 15 lbs. | 35 lbs. |
| Rhode Island Bent Grass | 25 to 40 lbs. | 14 lbs. |
| Rye Grass (Italian) | 40 to 50 lbs. | 18 lbs. |
| Soja Beans (broadcast) | 50 to 75 lbs. | 60 lbs. |
| (in rows) | 20 to 30 lbs. | 60 lbs. |
| Sudan Grass | 15 to 20 lbs. | |
| Timothy | 15 to 30 lbs. | 45 lbs. |
| Vetch (Spring) | 50 to 70 lbs. | 60 lbs. |
| Vetch (Winter) | 30 to 60 lbs. | 60 lbs. |
| Wheat | 90 to 120 lbs. | 60 lbs. |
| Potatoes, | 12 Bu. | 60 lbs. |
| Clover, } together, for one acre, | | 8 pounds |
| Timothy, } | | $\frac{1}{4}$ bushel |
| Red Top, } | | 1 bushel |
| Peas in drills are sown $1\frac{1}{4}$ to $1\frac{1}{2}$ bushels to the acre. | | |
| Carrots, | usually sown to the acre, $2\frac{1}{2}$ to 3 lbs. | |
| Beets, | " " " " " 4 to 6 lbs. | |
| Parsnips, | " " " " " 3 to 6 lbs. | |
| Onions, | " " " " " 4 to 6 lbs. | |
| Ruta Bagas, | " " " " " 1 lb. | |
| Turnips, | " " " " " 1 to $1\frac{1}{2}$ lbs. | |
| Beans, | " " " " " $1\frac{1}{2}$ to 2 bu. | |

Quantity of Corn Required to Plant an Acre, Five Grains in a Hill.

| | | | |
|----------------------------------|---------|----------------------------------|---------|
| 3 ft. x 2 | 18 qts. | 3 ft. x 3 | 14 qts. |
| $3\frac{1}{2}$ ft. x 3 | 10 qts. | $3\frac{3}{4}$ ft. x 3 | 8 qts. |
| 3 ft. x 4 | 7 qts. | 4 ft. x 4 | 6 qts. |

Number of Plants per Acre at Given Distances.

| | | | |
|---|--------|-------------------------|-----|
| 1 ft. x 1 ft. | 43,560 | 9 ft. x 9 ft. | 537 |
| $1\frac{1}{2}$ ft. x $1\frac{1}{2}$ ft. | 19,360 | 12 ft. x 12 ft. | 362 |
| 2 ft. x 2 ft. | 10,890 | 15 ft. x 15 ft. | 163 |
| $2\frac{1}{2}$ ft. x $2\frac{1}{2}$ ft. | 6,969 | 18 ft. x 18 ft. | 134 |
| 3 ft. x 3 ft. | 4,840 | 20 ft. x 20 ft. | 100 |
| 4 ft. x 4 ft. | 2,722 | 25 ft. x 25 ft. | 73 |
| 5 ft. x 5 ft. | 1,742 | 30 ft. x 30 ft. | 47 |
| 6 ft. x 6 ft. | 1,210 | 40 ft. x 40 ft. | 20 |

Quantity of Seed Required for a Given Number of Plants, or Number of Hills, or Length of Drill.

| | | | |
|-------------------------|---------------------------|------------------------------|---------------------------|
| Asparagus, | 1 oz. to 65 ft. of drill | Musk Melon. | 1 oz. to 60 hills |
| Beets, | 1 oz. to 50 ft. of drill | Okra. | 1 oz. to 40 ft. of drill |
| Beans, Dwarf, | 1 qt. to 100 ft. of drill | Onion, | 1 oz. to 100 ft. of drill |
| Beans, Pole, | 1 qt. to 150 hills | Onion Sets, small, | 1 qt. to 4 ft. of drill |
| Carrot, | 1 oz. to 150 ft. of drill | Parsley, | 1 oz. to 150 ft. of drill |
| Cabbage, | 1 oz. to 3,000 plants | Parsnip, | 1 oz. to 200 ft. of drill |
| Cauliflower, | 1 oz. to 4,000 plants | Peas, | 1 qt. to 100 ft. of drill |
| Celery, | 1 oz. to 400 hills | Pumpkin, | 1 oz. to 40 hills |
| Cucumbers, | 1 oz. to 50 hills | Pepper, | 1 oz. to 2,000 plants |
| Corn, | 1 qt. to 400 hills | Radish, | 1 oz. to 100 ft. of drill |
| Dandelion. | 1 oz. to 200 ft. of drill | Salsify, | 1 oz. to 70 ft. of drill |
| Endive, | 1 oz. to 150 ft. of drill | Spinach, | 1 oz. to 100 ft. of drill |
| Egg Plant, | 1 oz. to 2,000 plants | Squash, early, | 1 oz. to 50 hills |
| Lettuce, | 1 oz. to 4,000 plants | Squash, marrow, | 1 oz. to 16 hills |
| Leek, | 1 oz. to 100 ft. of drill | Tomato, | 1 oz. to 3,000 plants |
| Watermelon, | 1 oz. to 80 hills | Turnip, | 1 oz. to 150 ft. of drill |

One Gallon, by the U. S. Standard Unit of Liquid Measure contains 231 cubic inches.

The U. S. Bushel contains 2,150.42 cubic inches.

An Acre contains 43,560 square feet.
